Introduction

God loves all of us. He plays numerous roles in all our lives. God is a loving part of who we are. God wants to give us everything that we need to have to continue to exist in His Universe.

God uses nature as a way of giving us the essential elements that we need to sustain our daily lives. Our food comes from nature. Our water comes from nature. Practically everything that we need to use comes from nature. God is the strong force that manages nature so that He can give us what we need to keep us in existence.

God tries to have an individual relationship with each one of us. God begins His relationship with each of us when we are infants. It is extremely frustrating for infants to learn how to function as toddlers. God is there to help parents to deal with the needs and the development of infants and children.

God is there to help us to deal with psychiatric emergencies. God does not want us to hurt ourselves with illegal drugs, alcohol, or tobacco. God does not want us to face incarceration because of the way that we might use a firearm if we should own one. God does not want us to contemplate our own self-destruction. Suicides devastate God.

God does not want anyone to consider committing homicide. God must remove a human being from the freedom of existing in His Universe if he or she commits a homicide. A wrongful death devastates God. God cannot tolerate homicides. Homicides disrupt God's entire Human Family.

We must come to realize that God works with the Holy Spirit to help us to solve our problems. God and the Holy Spirit work together to stop our pain and suffering. God and the Holy Spirit help us to avoid committing crimes against ourselves and against humanity. God and the Holy Spirit work with our parents, educators, employers, and other loved ones to help us to understand that we must solve problems through peaceful confrontation and not by committing acts of violence.

It is so important to communicate with God every day. It is important for us to share our thoughts and conflicts with God. It is important for us to help God to help us and to help the people that we believe want to hurt us. God can work with us to deal with people that want to hurt us in a way that is constructive. Our relationship with God will not allow us to just hurt or to contemplate hurting someone just because we perceive that any of them are threats to our lives.

We must work with God to set constructive goals for ourselves from the time that we are children. We must teach our children to always pray to God. We must train our children to work with God and with the Holy Spirit to achieve their goals and to succeed in school and in their relationships. God and the Holy Spirit always want us to work with us to educate our children, siblings, and fellow students to help them to understand how to achieve their goals and to stay out of trouble.

Discipline should not happen just when a student does something wrong. Discipline happens when we warn our kids and young adults to avoid destructive and self-destructive behaviors. We must teach them the consequences of using illegal drugs, of using alcohol, and of using weapons. We must teach them that God does not want them to spend time in incarceration in a psychiatric facility or in a prison. We must teach them that God wants them to be part of Humanity for their entire lives.

The Basics

God provides us with all our drinking water. God creates water in underground water-production facilities. These underground water production facilities then pump water into all faucets and other mechanisms that need fresh water every second of every day.

We can just imagine just how incredible God can be when He creates and manages the production and distribution of trillions upon trillions of gallons of water every second of the day. God gives us that water for free and we sell it, buy it, or use it for free.

God creates our fruits and vegetables. God is a biological engineer that always produces fruits and vegetables that are compatible with the digestive system of every human that is part of humanity. God can create and maintain beautiful images of nonhuman life that he uses to create, to develop, and to maintain human life.

God creates and maintains nonhuman life. Some of these types of nonhuman life work for us as food that we eat to maintain our existence on this planet. We eat meat and seafood that we obtain from nature. Other animals, such as dogs and cats, can help us to recognize the existence of God in our lives. God creates nonhuman life to maintain the existence of human life in the Universe.

God works to process sewage so that the trillions of tons of sewage that we produce every hour all over the world will not pollute and incapacitate our oceans, lakes, rivers, and other bodies of water. God understands that pollution of the Earth's Oceans and Bodies of Water could destroy Humanity. God is personally involved in making sure that our bodies of water are safe for us. We never encounter drinking water that is poisonous. We never encounter sea water that is stained with deadly amounts of sewage.

God and the Holy Spirit produce all our crude oil in underground oil production facilities. God and the Holy Spirit produce trillions of gallons of oil a week. They give that oil to oil producing countries for free. These crude-oil producing countries then sell that oil at a 100% markup all over the world. We take it for granted that trillion of gallons of oil a day appears out of nowhere and that no one creates it.

God and the Holy Spirit produce all the world's natural gas. We manufacture natural gas in special natural-gas production facilities many miles under the surface of the Earth. God gives us natural gas for free and we sell it at a 100% markup. Are we ready to thank God for His kindness?

God purifies the atmosphere. God makes sure that our atmosphere is breathable and that its oxygen is safe for us to breathe. God does not want any poisons in the air that we breathe that might cause us to become sick or to die.

God produces chemicals and substances in nature that our scientists and engineers use to produce inventions, mechanisms, medications, chemicals, and power. Nature not only produces food, animal life, and plant life. Nature also produces chemicals and substances that allow God to help scientists and engineers to create medications and high-tech devices.

God and the Holy Spirit are responsible for working together with power plant engineers from all over the world to produce that substances that they will need to produce power for Humanity for an indefinite period. God and the Holy Spirit would never allow Humanity to run out of power. God helps technicians to restore power as soon as possible after a catastrophic power outage.

God and the Holy Spirit guide all our world leaders and government officials. God guides everyone that works for the United Nations. God promotes peaceful confrontation as the best way to resolve conflicts between nations. God does not tolerate violence to resolve conflicts between nations. All government leaders and officials all over the world must answer to God.

All Criminal Justice Systems answer to God. Criminal Justice Systems around the world must understand that God does not tolerate murder, torture, bribery, and the idea that criminals can get away with committing crimes forever. God will bring corrupt Criminal Justice Systems to justice eventually.

God and the Holy Spirit guide the development of all and creations of all new technologies and inventions. God must guide scientists and engineers into how to build a successful invention or mechanism. Scientists and engineers must have permission from God and from the Holy Spirit to create a new engineering project that would completely work for God and for Humanity.

All medical treatments for all diseases come from God and from the Holy Spirit. God helps our chemical engineers, our mechanical engineers, our electronics engineers, our doctors and our medical professionals to work with God to use all medical treatments that are available to treat illnesses. Science and medicine will always look to work with God to work to cure sick people with technologies that come from God and from the Holy Spirit.

God guides us when we need to save each other's lives. We do not want our brothers and sisters to fail when we have had a chance to work with God to save their lives and to save our own lives. God wants all of us to work together to save the lives of those of us that have lost control of their own lives and have become detached from God. We must work with God and with the Holy Spirit to do everything that we can to bring God back into a person's life after they have detached themselves from God.

God and the Holy Spirit work with us to prevent pain and suffering in our lives. God and the Holy Spirit work with us to stop the pain that we feel when we have recover from an injury from another person's efforts to hurt us. We must do everything that we can to work with God and with the Holy Spirit to heal our pain and the pain of others.

Our world's leaders must understand that we all answer to God. Our Human Family and our world leaders cannot continue to tolerate our pain and suffering. We all must work with God and with the Holy Spirit to save our lives and the lives of our children. We must make sure that our children will have better lives to look forward to than we have lived ourselves.

We must work together out of love for each other and out of love for God. We must respect the roles that God and the Holy Spirit will play in our lives to keep us alive. We must reward God for what He does for us by achieving parenthood and by showing unconditional love for all our brothers and sister both in our lives and also around the world. All world leaders should go to God for help so that they could have a better idea about how to end conflict within Humanity.

What Does God Expect from Humanity's Governments?

All world leaders must answer to God. All the world's governments must answer to God. All our governments around the world must understand that God exists for all of us. God expects our governments to encourage and to promote every human being's relationship with God throughout the world. Our governments must understand that what they do must be consistent to what God wants them to do. World leaders can face a catastrophe if they believe that they can do anything that they want to do and that God's presence in their lives does not matter to them. World leaders must show sympathy for world leaders that confront God's existence by threatening Humanity.

God wants to work with world leaders to prevent suicides and homicides. A suicide is a tragic event for Humanity. A suicide disrupts God's Human Family. A homicide disrupts God's Human Family. Our world leaders must stop God suffering by implementing special programs to help our young adults that committing suicide and/or committing homicide will not work to solve their problems at all. Our world leaders must work with God to stop wrongful deaths, suicides, and homicides all over the world.

Our world leaders must work with God and with the Holy Spirit to find ways to end conflict peacefully through peaceful and constructive negotiation. They must understand that God will punish them if they try to solve problems by using violence. God will use torture and other ways to punish us if we use violence to accomplish a peaceful settlement in a conflict between our nation and another nation. God wants to stop punishing us for our violence toward other nations.

The United Nations can become the Official Government of The Nation of Humanity. God wants us to unite into one nation all over the world. That would benefit us and all our brothers and sisters. God would be better able to love us and to successfully deal with our problems if we could find a way to achieve universal human unification through making the United Nations the capital of Humanity. It is a beautiful dream that can become a beautiful reality.

God expects government leaders to promote the successful creation and the successful development of human life in their countries. God loves to be successful in His efforts to create human life. God wants His world leaders to understand that he expects the government to do anything that they can to promote the existence of babies and children in their countries. That is about helping parents to sustain children in their homes. It is about making sure that children will get food and medical treatment from the government. That means that we will introduce children to God.

God expects our governments to promote prayer as a way that their citizens can reach out to God for help and support. God wants our governments to teach our kids and young adults about the advantages of maintaining a powerful relationship with God. God wants our kids and young adults to respond to Him at an early age so that He can help them to succeed in their lives. God wants to stop our students from failing in schools, relationships, and jobs by having a presence in their lives that will help Him to communicate with Him.

God hurts when he must deal with warfare. God in no way authorizes or promotes the use of weapons with the intent to cause pain and suffering upon others by military forces. God will use anger to torture anyone that believes that it is justified to attempt to destroy life and/or to destroy life within God's Human Family. The threats of war will end because these threats are incompatible with God's will and with His determination to end wrongful deaths and evil throughout His Universe.

God does not tolerate malicious intentions by one country to injure another country. God will not tolerate hatred and homicidal conflict between nations. God will not tolerate a nation that accomplishes a detachment from God because of its need to injure and/or to destroy another nation. God and the Holy Spirit allow military forces from all over the world to be armed and to be prepared for an armed conflict that could lead to wrongful deaths. These weapons are mostly used to deter violence and the destruction of human life. These weapons are not supposed to be used to kill or to threaten to kill anyone. Our leaders must understand that all our militaries from around the world have no right to use weapons to injure, to attempt to injure, to kill, and/or to attempt to kill other human beings. Our militaries must work to preserve life and not to try to destroy it.

Our governments should show compassion for low-income families that struggle to survive daily. We must do everything that we can to work with our governments to make sure that everyone has a humane and acceptable standard of living. We can just allow our brothers and sisters to drift around as homeless people that have no one that can love them or care for them in anyway. We must show compassion for those of us that struggle with low income. Our world leaders should understand that we must work with God to solve these problems.

God wants to achieve a peaceful coexistence between Himself and with all the Governments of Humanity. God wants the conflicts between Himself and the Governments of Humanity to end. God wants to live in peace with all the governments of Humanity. God wants to show nothing but unconditional love for all the employees of the world's governments. God wants our governments to work to achieve salvation for all of us that have been facing pain and suffering endlessly through our lives.

Our governments in no way can obstruct or to try to obstruct their citizens' relationships with God. Our governments must implement special programs that will help all citizens to find God through prayer and through religious worship. Citizens of a government that has achieved an Attachment to God can expect help from God. Those citizens should also want to receive help from God and from the Holy Spirit. Our world governments should try to achieve an attachment to God to help Humanity to be a better experience in the Universe.

God must work with its citizens to provide them with lawful aid and protection. They will be deterred from committing crimes. They will be deterred from being the victims of crimes. The mission of all law enforcement agencies is to serve and to protect the citizens of their communities. The governments must do everything that it can to help our citizens to feel safe in their communities that are protected by law enforcement and by God. God will always help governments to provide lawful aid and protection to all its citizens.

Our governments must work with God to prevent wrongful deaths and human suffering. We should feel bad when someone commits a final crime such as a homicide because that person is homeless and cannot find any job. Our governments cannot support the detachment from God that happens before a tragedy like a suicide or a homicide. The best way to start to solve the problem is to get our relationships with God and with the Holy Spirit involved. The second part of the problem is to help our brothers and sisters that are in desperate need of food, water, essential items, medication, and psychiatric treatment. All of us must receive psychiatric treatment as some time in our lives. Psychiatric treatment could save hundreds-of-thousands of lives if our governments could work with the United Nations and countries like the United States to provide life-saving help to our brothers and sisters.

All Governments Answer to God

All government officials all over the world would benefit by welcoming God's advice and approval in the way that they approach the efforts to solve problems with their citizens in their country. World leaders must respond to the way that God wants them to consider solutions to problems. God needs to be involved in the way that world leaders make decisions. God sincerely loves all a nation's citizens. God wants to become personally involved in helping our world leaders to make the right decisions to benefit their citizens and to subsequently benefit the entire Human Community.

All world leaders must have an individual relationship with God. God wants to be part of the lives of our world leaders. God wants to help our world leaders to do good things for a country's citizens. God wants to be there to help a world leader's government to emerge from a life-threatening crisis within a nation. The best resource that a world leader could go to for help and support during any minor crisis or any major and life-threatening crisis is to go to God for help. The best world leader that we can have are those that have achieved an Attachment to God. Operating a country is so much easier and so much more productive when its leaders have achieved an attachment to God and that respond to God's will and counseling.

World leaders must understand that their citizens are part of the Family of Humanity. They need to understand that our brothers and sisters around the world may someday become the citizens of The Nation of Humanity. We must understand our obligations to love and to care for our brothers and sisters all over the world. Our world leaders have a responsibility not only to care for their country's own people but to also care for our brothers and sisters in other countries. We need to work with God and the Holy Spirit so that we can develop the capability to love each other in times of crisis and in times of happiness. God wants all world leaders to understand how much He loves them and how desperate He is to find a way to help them.

World leaders must promote peace and tranquility among the citizens of their own nation. A world leader must call in God and the Holy Spirit to help him or them to make decisions to stop an eruption of violence within a country's borders. God and the Holy Spirit have special ways to help a government's leadership to stop rioting and panic within a country. God loves all of us. The existence of mass violence such as rioting is incompatible with God's Human Family and with the way that He manages Humanity. God works with the government to stop all violence completely. God will not tolerate the existence of any government that cannot work with Him to stop death, violence, and human suffering within a country's borders. Going to God for help is the best way for a country's leader to solve problems that exist in his or her country. God must work with a country's leadership to stop violence and hatred that fuels the flames of violence in a nation.

Only God decides who should live and who should die. Our military does not have the authority to make a decision that justifies killing someone. Our military promotes the betterment of Humanity by preserving the peace and tranquility that Humanity deserves after enduring centuries of pain and suffering. This means that God has disabled their weapons. Their weapons do not work to injure others when God seeks to stop warfare now. God can torture us for thinking that we can find the legal justification for murder.

A government cannot use its power to promote birth control or to obstruct the way that God wants to bring a new human life into this world. God is the Supreme Being that is the Creator of all human life. Our governments must share in the joy of welcoming new human lives into the world with the parents and with the loved ones of the newly born child. God will not tolerate limits on the number of children that a family can have. God will not state-sponsored abortion or state-sponsored birth control for our young adults. God will punish our world leaders if they try to intimidate the way that He creates human life and the way that He brings a new human life into the world.

World leaders should respond to the Will of God during a military emergency. God wants to help military leaders to resolve a military conflict as soon as possible while minimizing the loss of life. World leaders must answer to God and to the United Nations when they feel obligated to use military intimidation and violence to resolve conflicts with each other. God in no way tolerates violence as part of the military action that world leaders can use to solve a conflict. Humanity will not tolerate violent and prolonged military conflict. We must work with God to find ways to end conflict rather than to tolerate it for long periods of time. Prolonged military conflicts that result in mass death and suffering is incompatible with the way that our Human Family has emerged to become Part of God.

God is a good force that is there to help to guide government officials all the time. God is always there to help the employees of any government on the Planet Earth. God wants our government employees to do good things for Humanity. God wants to be part of the good things that an employee of a government will do for Humanity. God wants to be part of the success of a government in keeping the peace and supporting and developing human life by loving its citizens. God wants our governments to help Him to bring as many new human lives as possible every day of the year. That is why God is part of the government of every nation on this Earth.

Government officials must understand the consequences of ignoring God when they must make important decisions. It is very easy for a government employee that is detached from God to commit a crime in a way that makes him or her think that he or she is immune from prosecution. God cannot help such a person to escape incarceration because of the person's detachment from God. People that work for the government can do very bad things if they have achieved a detachment from God. God wants to stop them from committing crimes. However, they do not know who God could be in their lives. The consequences of a mistake that a world leader will make during a crisis can be catastrophic if that mistake has nothing to do with God intervention in our problems.

God does not tolerate violence under any circumstance. God will punish anyone that believes that he or she is justified by committing a homicide. God will not tolerate any government that tolerates torture, violence, and murder. Government officials do not understand the number of ways that God can punish the members of a government that might believe that using violence repeatedly does not carry any consequences as far as God is concerned.

We should pray to God for a way to find the way to work with our brothers and sisters all over the world to achieve Universal Unification. That means that all our countries would become a Nation of Humanity. The United Nations would be the government of the Nation of Humanity. New York City would be the capital of the Nation of Humanity. It would benefit all our brothers and sisters all over the world to declare ourselves The Nation of Humanity.

Humanity Is One Family

The same One True God has created all of us. God has worked with our parents, our educators, our friends, and others to develop us from the time that we were born. God loves all of us. We all must answer to God. We are all brothers and sisters that come from the same Father which is God. We are all one family. We are supposed to love each other and to care about each other. We are supposed to recognize the existence of God in our lives. We must come to understand how to communicate with God. We must learn how to communicate with the Holy Spirit. We must try to find God in our lives. We will all discover that we are all one nation when we all try to do all of that all over the world. We will discover that we are one family when we all try to find God.

We are all created in the Image and Likeness of God. That means that we are all brothers and sisters. The same One True God created all of us in His Factory of Human Life inside of our mother's body. We all answer to God as brothers and sisters that are all the same. There is no such thing as an anyone that is superior to anyone else. We all exist on one level as God's Children in His Human Family. That is true of all our brothers all over the world.

God loves all of us because we are His children. He cares about us. He provides us with everything that we need to exist in His Universe. He supports our ability to work with Him to create human lives and to develop them. God wants to love us so that more human lives will come out of our relationship with a spouse of the opposite gender. Our love for God brings peace and happiness to all of us and to all our family members and to all our children. We are all part of the Family of Humanity.

We must show kindness and compassion for those of us with mental illnesses that lead them to become a threat to themselves and/or a threat to others. We must understand that they also are part of Humanity. We must try to give them the best chance to survive what they have gone through by giving them psychiatric treatment as children. God and the Holy Spirit must be there to help our doctors, parents, and educators to respond to the warning signs so that we can save every life that we can possibly save. We can have the maximum number of patients living productive lives if we can get them help when they are children.

We must try to forgive our mentally ill brothers and sisters for expressing the intent to hurt themselves and/or to hurt others. We must rely on law enforcement officers and emergency psychiatrists to make sure that these types of psychiatric patients will not harm themselves and/or will not harm others. We should care enough about people with mental illness to understand that God and the Holy Spirit want to intervene in their lives before it is too late. Too late means that they have attempted to hurt themselves and/or they have attempted to hurt others. God may no longer allow this to happen in the future.

Providing essential psychiatric treatment for our children and young adults is very important. Teaching problem children how to pray is essential. Teaching them how to reach the God that lives in their lives is also important because God can work with psychiatrists and psychotherapists to save the lives of these kids and young adults. We must understand that this is a major problem for our governments and that our world leaders must go to God to get help with regards to getting children and young adults psychiatric medications.

We must pray for our mentally ill brothers and sisters that pose a threat either to themselves and/or to others. We must try to work with God to get involved in helping our brothers and sisters that they have everything to lose by hurting themselves and by hurting others. It is a good thing when we teach these types of patients how to pray and how to reach out to God. We must try to help these patients to get involved with God to try to save their lives. These patients must understand that God is there to help them and to work with them so that they can function and to lead a normal life.

Our relationship with God can help us to help others that are suffering from mental illness. We can help and support a family member that is sick. We can support a friend or a spouse that is sick. We could support a child or a teenage that has become ill. We must intervene before the patient does something that is so drastic that it could mean the end of the patient's life.

We must try to show love for others after we have experienced the Love of God in our own lives. God is there to show us how to love others. God is there to show us how to turn our love for a spouse of the opposite gender into new human lives. God is there to help us to develop a new human life for the rest of our lives. We are there to promote God's happiness by achieving parenthood. We can do better than mental illness by teaching ill family members about the healing powers of God and what those healing powers can do for them.

God, The Holy Spirit, and Humanity must all work together to achieve a final unification of God's Human Family. We will someday stand before God and the Holy Spirit on this planet. We will ask for the right to unite into One Human Nation. We will ask for the right to find ways to explore the Solar System. We will ask for the right to cure diseases such as cancer and heart failure. We must dream about a better future for our children than we have achieved for ourselves. We must come to peace with each other and with God eventually. The time to start doing this is now.

One of the benefits of Universal Unification would be to get the authorization from God and the Holy Spirit to design and build a spaceship that will allow us to explore the solar system. We should behave ourselves before we can consider the opportunity to go to God and to ask Him for permission to build such a spaceship. The decision is up to him.

We must teach students how to show love for God. We must teach children and young adults how to respond to God's intervention in their lives. We must teach students the types of things that God wants to hear from them. We must help our students to understand that God is always there with the capability to help them if they need help. God and the Holy Spirit must try to help those students that reach out to them for help, for guidance, and for support. That is what the Love of God in our lives is all about.

We must show love for each other. We must show love for each other by praying to God to help a sick family member. We can pray to God to give us advice as to how to get the family member medical treatment. We must report a student to the police department if that student has been using illegal drugs. We must work with God to do everything that we can to save the life of a family member or of a close friend by showing them the Love of God that we have experienced.

We must never express the intent to hurt ourselves and/or to hurt others to God. Expressing the intent to hurt oneself and/or to hurt others deeply hurts God. God will force us to receive psychiatric treatment if He sees any of these problems within us. God will do everything that He can to work with Psychiatrists to stop us from being a threat to ourselves and/or to others.

The Government Helps Us to Reach Out to God

The government works to provide us with our education. That is a good thing. All our students in both religious schools and public schools need to reach out to God. The government cannot use the Constitution of the United States as an excuse for allowing public school students to become detached from God and to make them think that they can ignore God. Students in religious schools do learn about God. However, they do not receive the funding that public schools receive. This is a major problem. We should address this in the future.

The government helps to teach us the difference between right and wrong. We see movies and television shows all the time that show characters that resemble government employees that teach us what is legal and what is not legal. The government wants all our kids and young adults that illegal drugs, alcohol, and tobacco are bad for them. Why do they not teach courses about that in grammar schools and in high schools? Our kids and young adults should find out about the dangers of substance abuse by themselves when law enforcement officers catch them doing drugs. Is this the way that God wants our kids and young adults to learn about substance abuse? We should teach our kids to be realistic about substance abuse issues before they can get arrested for not knowing about substance abuse issues.

Government employees work with God to help us in many ways. The government sets up emergency relief operations after a natural disaster. God works with the government to give us unemployment benefits and disability benefits when we lose a job or get to sick to work. The government provides us with hundreds of programs that help us. God and the Holy Spirit can guide us to take full advantage of government aid and government programs that can help us to solve our problems and/or to relieve our pain and suffering. God guides us through government programs that we can use to help us to solve our problems. These programs are ideas that start because of God's intervention in our Federal Government.

Federal employees and the employees of other governments work for God. God guides them. God supervises them. God tries to help them to solve their problems. God tries to work with them to meet the needs of toddlers, children, and young adults. Human beings work for the government because they want to show love for God by showing love for Humanity. Government workers do everything that they can to do their job and to answer to God's will at the same time.

God and the Holy Spirit have a big influence as to which laws will come into existence and which laws will die in a legislature or by a veto. God understands the needs of His sons and daughters throughout the world. God understands every crisis that Congress and the President will face in the United States. These are lawmakers and federal workers that have their jobs because of God's intervention in their lives. We are in an emergency in the United States. God wants to use all the power and influence that He can to solve the problems that we are facing. God and the Holy Spirit are struggling to reach and to influence lawmakers and presidents of countries all over the world. This is a desperate emergency. This is when God feels that He must get involved.

Government-funded healthcare is merciful with all of us that do not have the money to pay for our medicine and medical bills. We are thankful that our government worked with God to develop universal healthcare legislation.

The Government encourages lawful behaviors that help us to respect God and to respect Humanity. The singing of the National Anthem is a ritual that honors the creation and the development of the United States. Singing "God Bless America" honors our government's relationship with God. "In God We Trust" is inscribed on every coin and on every bill of cash. We honor God and Humanity when we visit the Arizona Memorial at Pearl Harbor. The Pledge of Allegiance helps us to understand what an honor it is to be part of the United States. God is honored by what Humanity does when it tries to honor the Legacy of our Founding Fathers and the creation of the United States. God very much contributed to the formation and the creation of our nation. That is one reason why we respect God here and that God is part of our government.

The government respects God by deterring us from self-destructive behaviors. Commercials always remind us not to drink alcohol and to drive under the influence. The government is always there for us to tell us what to do before, during, and after a natural disaster. It is easier for us to get help when we need it because of the way that God is there for us. It is important work with God if we need to benefit from government programs.

The Existence of God helps in the development of our children's lives. Children feel the love of God from the time that they are born. Parents feel the love of God in a much different way when they achieve parenthood. God shows love for Humanity by answering death with an effort to conceive and to bring tens-of-thousands of babies into the world every day of the year.

Humanity's Laws and God's Laws

God supports laws and regulations that support our rights to receive lawful aid and protection from the government. The government must realize that God and the Holy Spirit work together with a country's law enforcement agencies and criminal justice systems to serve and to protect their communities against harmful and life-threatening crimes. God supports laws that encourage that support crime prevention and substance abuse prevention in our communities. God wants our governments to enact laws that would make it possible for our governments to save the lives of substance abusers and would-be substance abusers.

God's Laws help us to stop our pain and suffering. Our laws help our brothers and sisters to find ways to find the God that exists in our lives. Our laws deter us from engaging in destructive and self-destructive behaviors. Our laws contribute to our ability to work with our brothers and sisters to stop crime and to help us to prevent self-destructive behaviors.

Our laws should help us to teach our children and young adults about the dangers of substance abuse. The government has not been implementing laws to help parents and educators to help our children and young adults that they must stay off dope, alcohol, and tobacco. Our government cannot be afraid to put a few bars out of business as it tries to stop our young adults from becoming alcoholics. We should immediately close clubs that offer drugs to our young adults and to adults. God likes laws that help Him to close any business that makes it easier for anyone to find illegal drugs.

All our lawmakers have a special and individual relationship with God. Our lawmakers work for God. Our lawmakers work to help all our brothers and sisters all over the world to defeat the evil that may appear in their lives. God wants our lawmakers to help all of us to live better lives by giving us access to medical treatment, employment, an excellent education, and a chance to pursue ways to study our relationships with God. God expects all lawmakers to reach out to God in times of crisis.

Humanity's laws are God's Laws. The government works to uplift the standard of living of all of us by encouraging lawmakers to pass laws that give us the money that we will need to help homeless people and people that have been hooked on illegal drugs. The government now helps all of us to reach medical treatment for all our citizens in the United States. That is a major accomplishment for not only our country but also for Humanity. God's Laws and Humanity's Laws are meant to help all of Humanity's members.

God's Laws give law makers of our governments the opportunity to receive give rewards to all our brothers and sisters that want to help their each other to lead a better life. God wants our laws to make it possible for our young adults to see achieving parenthood with an acceptable standard of living as a realizable goal and possibility.

God's Laws seek to authorize the government to punish us for inflicting pain and suffering upon ourselves and/or upon others when God detects that we are trying to hurt ourselves and/or trying to hurt others. God employs the government to stop anyone from causing pain and suffering for the members of His Human Family. God wants the government to enact God's Laws so that the government will have the authority to stop violence and self-destructive behaviors.

Our Criminal Justice System must decide when our laws are compatible with God's will. Our government officials must understand whether any of our laws are compatible with the Laws of God.

God is our Supreme Being. We must look to God for guidance. Our criminal justice system must look to God for guidance to understand which laws are agreeable to Him and which laws need to be thrown out and repealed.

Lawmakers work with God to sponsor legislation that would benefit Humanity. Lawmakers care about how God feels about Humanity. Lawmakers want to do everything that they can to help all citizens of their nations. God tries to guide lawmakers so that they will enact legislation that would be compatible with His mission for our governments. Our governments must understand how to go to God for help in dealing with their citizens. Lawmakers must agree with God in the way that they enact laws that benefit the wellbeing of the entire human race.

God should be a part of all the decisions that lawmakers consider improving the standards and living conditions of their nations. No one cares about the citizens of a nation more than God does. Our lawmakers look to God for help in understanding what they need to do to help their brothers and sisters in a country. God must be able to guide lawmakers so that the laws of a nation will be compatible with what He wants to help His Children in a nation.

All courts answer to God. Courts must decide whether laws that are enacted by Congress are compatible with the standards of God and of the Holy Spirit. Lawmakers cannot offend God by passing legislation that will serve to hurt God and to hurt citizens of their nation. God appoints judges to decide which laws are appropriate for a nation and which laws should be repealed. The citizens of a nation do not detect the influence of God on the nation's courts, legislature, or executive branches of government.

God and the Holy Spirit have major influences over the way that they appoint judges to oversee the activities of the government and of the citizens of a nation. God wants to have a strong and individual relationship with each judge that He works to appoint to oversee a nation's citizens. God sometimes gives certain lawyers special powers and advantages that benefit them by giving them an advantage over everyone else that would want to serve as a judge. That is how God and the Holy Spirit come to oversee a country's criminal justice system.

God and the Holy Spirit has secret relationships with all employees of a country's criminal justice system. God guides law enforcement officers to solve all criminal justice mysteries and to bring criminals to justice. The Holy Spirit oversees our courts so that the opinions of judges will be compatible with the opinions of God.

The reality is that God and the Holy Spirit want our global criminal justice systems to show mercy and compassion for those of us that commit crimes because of an untreated psychiatric disorder. We should help those of us that have psychiatric disorders to obey our nation's laws. God wants to participate in programs that would help all patients with a mental illness to lead normal lives and to avoid incarceration.

We all answer to God's Laws and to Our Nation's Laws. We must respect the will of God and the wellbeing of Humanity whenever God and the Holy Spirit try to prevent us from hurting ourselves, hurting others, and/or committing crimes.

What God Accomplish for Governments

God guides all government employees through their individual relationship with God. God helps government employees to serve and to protect Humanity. God helps the governments to provide lawful aid and protection to all the Citizens of Humanity. Our government employees work with God and with the Holy Spirit to deter and to end violence, substance abuse, homelessness, crimes, corruption, and starvation throughout the borders of our countries. God shows government employees how to work with the citizens of their nation to make sure that their citizens never run out of food or water. We must make psychiatric treatment to all those who need that type of treatment before they destroy themselves beyond repair.

God and the Holy Spirit to guide and to help our citizens in a state of emergency that can be caused by a natural disaster or a violent military conflict. God and the Holy Spirit works with government employees that need to guide us during a State of Emergency. We should pray that our government employees that are in a State of Emergency will understand God and the Holy Spirit when they guide our Emergency Relief Workers, our National Guard, and all other government employees that must deal with an emergency with a nation's borders.

God and the Holy Spirit will always help our engineers and scientists to develop new inventions and technologies that will continue to benefit Humanity. All proposals for the development of inventions must be approved and supervised by God and the Holy Spirit. God and the Holy Spirit can work with our scientists and engineers to create the medications and medical treatments that they want to exist for our medical community. God and the Holy Spirit help all our scientists and engineers to make sure that every one of our efforts to invent a new chemical, a new medication, or a new technology will succeed and that will help Humanity soon.

God works with our world leaders and with the United Nations to stop violent conflicts between nations. God has an individual relationship with all the world's leaders. God has an individual relationship with world leaders in the United Nations. God and the Holy Spirit will not tolerate violent conflict between nations. God expresses His anger when violence breaks out within a nation or between two or more nations. It is our obligation to God to work with our world leaders to stop looking to violence to resolve conflict. We do not have the authorization to injure or kill others if we declare a war between each other. God will punish us for believing that we can escape prosecution when we believe that we can authorize murder in a war that is totally detached from God. God will in no way continue to tolerate violent conflicts between nations.

God forgives us when we do things that are wrong. We must forgive our brothers and sisters from other nations for expressing the intent to hurt us. We must investigate our conflicts with nations that dream about hurting us. We must look to our relationships with God and the Holy Spirit to help us to understand the real reasons why nations want to hurt us or to kill us.

Thinking that nations are out to hurt us is a paranoid thought. This is a symptom of a chronic psychiatric disorder. We must show love for God and for the Holy Spirit by finding ways to work with them to understand the real reasons why others show the intent to hurt us. We must then solve our problems with those nations through assertive and peaceful confrontation.

God and the Holy Spirit employ the United Nations to help them to stop violence and suffering all over the world. The United Nations is a global organization that answers to God. God reaches out to help Humanity by working with the United Nations. We all hope that the United Nations will someday be the Capital of Humanity. The mission of the United Nations is to stop violence and suffering between nations all over the world. The United Nations has a mission to contribute to the Unification of Humanity. The United Nations will allow our brothers and sisters all over the world to join us in exploring the Solar System. The United Nation loves God, the Holy Spirit, and Humanity.

God tries to dissolve and to deter violence between nations through His individual relationships with world leaders. God tries to help our world leaders to be sensible when they are considering authorizing violence between two countries. God haunts world leaders that think about attempting to escalate their level of violence to a point that it causes pain and suffering for God's entire Nation of Humanity. God repeatedly warns government leaders that He will not tolerate violence between nations at this point in human history. God makes it perfectly clear that there will be consequences that will follow a decision to use violence to resolve a conflict between two nations.

God supports peace, love, and tranquility to be shared throughout Humanity. God wants all His children to achieve happiness when they are part of His existence. God wants to stop hatred between our brothers and sisters. God wants our brothers and sisters to show love, caring, and compassion for each other. God wants Humanity to evolve into a peaceful experience for all of us.

God shows love for world leaders that are committed to encouraging maintaining the peace and tranquility that should be shared by all of us throughout His Human Family. God wants to promote and to endorse world leaders that want to preserve nations to stop violence, suicides, hatred, and causing pain and suffering for God. God will remove a world leader from power if he or she violates His will, His Laws, and the Missions that God wants a country to achieve. God in no way continue to tolerate any world leader that promotes murder, suicides, torture, and/or warfare on this planet.

God supports the economies of Humanity. God provides our world governments with free water, free natural gas, free crude oil, free sewage management, free breathing air purification, and affordable in definite creation of power. World leader cannot take what God gives to their citizens for granted. World leaders should show respect and admiration when our Supreme Being takes care of a world leader, his or her government, and his or her citizens. We must honor God for creating all our fruits and vegetables for us. We should thank him for giving our chemical engineers the natural substance that they need to create medications and other fluids that benefit us.

Humanity's militaries must learn and fantasize about playing peacekeeping roles all over the world. Showing or fantasizing about the intent to hurt our brothers and sisters through a military operation is inconsistent with God's Will and is inconsistent with what God will continue to tolerate in this point in human history. God no longer tolerates justified and authorized warfare. God no longer tolerates excuses to think that a murderer should not be prosecuted for killing someone. God is exhausted by the number of wrongful deaths, deaths that He does not authorize, that occur all over the world every hour of every day.

God can do many things to hurt us. We should be intelligent. We should stop trying to justify violence. Our world leaders must stop authorizing violence, attempted murder and murder. We should make peace with God by understanding that we have no right to hurt or to attempt to kill anyone.

What Governments Do for God

Our governments promote the creation and the development of human life. God loves to create human life. God loves to work with the government to create a successful school for our children and young adults. God wants to help toddlers, children, and young adults to have the nourishment that they will need to function properly in school and outside of school. Governments promote the education of our students. God stimulates the economy of our nations. God works together with government agencies to teach us to teach doctors and medical professional how to work to save lives. The government works with God to make sure that our nations' economies function properly. Governments work with God to try to stop psychiatric disorders and substance abuse disorders from ruining and from destroying the country's citizens' lives.

Government employees show their love for God by serving Humanity in different roles as servants of God that try to help the citizens to find God. Government employees try to go to God for help in resolving issues that pertain to the wellbeing and the safety of the country's citizens. Scientists and medical doctors go to God to find the best possible ways to fight diseases and to research God's immense creation of the Universe. We are thankful that governments fund scientific research and try to develop modern treatments for different types of medical disorders. God is thankful that our governments sponsor and fund scientific research projects.

Our governments work with God to provide essential human services to all the Citizens of Humanity. Governments must make sure that their farms must work with God to keep up the demand for food within the country. Our governments must work with God to make sure that parents and families have everything that they need to contribute to the development of babies, toddlers, and children. Our governments work with God to make sure that our families have the adequate income to support the creation and the development of Human Life for God. Governments must make sure that they can work with God to provide the assistance that is necessary to develop human beings at all stages of human life.

Our governments try to maintain a peaceful coexistence between God and all the officials and employees of the government of a country. Our government employees work together to find God and to bring God the satisfaction that He deserves from a nation's population that loves Him and that He in turn loves. Government employees work with God to resolve conflicts with each other. Government employees must develop and maintain a peaceful coexistence with the Existence of God.

Our government employees must understand that they must work with God to obtain help to solve a country's problems. Government employees must see their relationships with God and with the Holy Spirit as ways to solve problems and to bring an entire nation closer to God and away from a detachment from God.

Our governments must show love for God by resolving conflicts between each other by engaging in peaceful confrontation in a way that God can be part of the peace-keeping process. Our governments must honor God by resolving conflicts between different nations by achieving peaceful agreements without any show of hatred, violence, warfare, and/or the intent to hurt others.

Our governments work with God to show love for Him and for our brothers and sisters. We show love for God during national holidays. We show love for God when we give presents to our children during the Christmas Holidays. Government employees show love for God by loving our

students by working with God to develop them into citizens that will represent the next generation of a nation's adult citizens. Government employees must work with God and with the Holy Spirit to make sure that all of us can develop our babies, toddlers, children, and young adults properly.

Our governments promote the educational development of our toddlers, children, young adults, and adults. We must teach all our students about how they will benefit by spending time to learn about how to pray and to understand how a relationship with God can benefit them in their lives. Our governments can never repress religious freedom and religious education within any of God's nations. Our governments should help their citizens to understand that God is always part of their lives. Government leaders should teach their citizens that they should always go to God for help and guidance. That is how a country can maintain a successful government and a successful society within its borders.

All governments promote the love and respect of our One True God. We must recognize the role that God plays in working with us to create and to develop all human life. Our governments are obligated to inform their citizens that all human life comes from God. We must teach our children that God creates human life in the body of every woman in His Factory of Human Life. We should show respect and love when God succeeds in creating a new human life that will be developed by his or her parents for the resto of their lives.

World leaders must work with God to progress to one day achieving the Unification of Humanity. We must dream of someday becoming part of the Nation of Humanity. We must dream of achieving a universal love between all of our brothers and sisters from all over the world. We must dream to the end of religious conflict, military conflict, and the pain and suffering that provokes conflict throughout the world. We must work with God and with the Holy Spirit to find something better in a whole than something that is fractured in parts. Humanity is better that Humanity that is fractured in parts all over the world.

Our governments must make strong efforts to discover the Will of God. We must do everything that we can to fulfill the Will of God. We have a much better opportunity to develop into a better Human Family if we do what God wants us to do than if we believe that we can ignore God and that we can do anything that we want. We hurt God and we hurt ourselves when we ignore what He says that He wants us to do and we do whatever we want to do. We want to do the best that we can to show love for God by following His directions in the way that we will work with Him to solve our problems.

Our world leaders must work with God and with the United Nations to once-and-for-all stop violence and wrongful deaths in within God's Human Family. World leaders have come to a point where they have come to understand that resolving conflict with violence does not resolve any problems and injures God and God's Creation. World leaders must stop making God suffer by promoting violence as a way of life all over the world. We should teach our brothers and sisters to reject violence and to embrace efforts to work with God and with the Holy Spirit to work toward peaceful and constructive resolutions toward solving our conflicts with the citizens of other nations.

God and Successful International Human Unification

God is the Patriarch of Humanity. God considers His children to be part of a whole human nation. We are all part of an International and Global Family that answers to a One True God. God founded Humanity many thousands of years ago. We must respect the fact that God has created each one of us. We must recognize God's remarkable accomplishments as He proceeded to create Humanity and to bring Humanity to this point. We must understand that God is the boss. We answer to God. God will be our central figure as we pursue a successful realization of a dream to unite with our brothers and sisters all over the world into One Human Nation, The Nation of Humanity. The United Nations would be the government of the Nation of Humanity.

We are all brothers and sisters. We are all human beings no matter what part of the world that we come from. God creates all of us in His Image and Likeness. God creates all of us in the same way by building us in His Factory of Human Life inside of the body of every woman. We love God the same way as we love any of our brothers and sisters. Our goal is to work with our brothers and sisters to find God and to work toward understanding that we all must love God and that we must love each other all over the world. We should understand that God suffers when we have thoughts that express the intent to injure oneself or to injure others. We need to stop God from suffering by having only loving and productive thoughts about ourselves and about others. We should seek psychiatric treatment if we need to express the intent to hurt ourselves and/or to hurt others.

We all answer to God. God gives us a lot of freedom. We think that we can do anything that we want to do. We do not believe that God should approve anything that should do with our education, family life, or our employment issues. God cares about us. We cannot exist in a long-term detachment from God. We will fail in school, in our relationships, and in our jobs if we believe that we can ignore God in our lives. We could find ourselves homeless or incarcerated in a psychiatric facility or a prison if we do not care about what God wants us to understand about our lives and about the lives of our brothers and sisters. We should teach our toddlers, our children, and our young adults to love God and to respond to God's opinions about our lives so that we can make the right decisions about what we need to do.

God deserves happiness from us. God does not deserve to cry during an eruption of violence in another part of the world. God does not deserve sorrow when He witnesses murder repeatedly every day. God does not deserve sorrow because of one nation's intent to inflict harm upon another nation for no justifiable reason. God does not deserve to experience the suffering when He sees suicides and homicides all over the world every day of the week. We should start to work with our brothers and sisters from all over the world to stop God's suffering over the behaviors that he sees in us like homicides, suicides, and substance abuse.

Violence between us causes unbearable suffering for God. We do not have the authorization to destroy human life. We cannot gain anything from trying to injure a human life. People that use violence with the belief that it is worth the while to do that are detached from God. God does not in any way support the use of violence to solve any problems. That includes life-threatening problems. God cries and suffers every time that He sees the result of the suffering that comes from violence between two or more people. We must stop God from suffering by being merciful with each other and not trying to find excuses to hurt ourselves and/or to hurt others.

International Unification means that we will no longer be able to generate the energy to cause God to suffer. We will no longer have hateful thoughts between ourselves and our brothers and sisters. We will no longer try to injure human life. We will no longer try to destroy human life. We will no longer seek to use military force to resolve conflicts between nations. We will stop believing that we are different from each other because we come from different parts of the world. We will come to understand that all human beings from all over the world are brothers and sisters that answer to a One True God.

We must promote the healthy and productive conception, birth, and development of human life for all our brothers and sisters throughout the entire world. Our brothers and sisters will get much needed assistance that will help parents and families to complete successful pregnancies and to promote the productive development of human life. This should be an international effort. God wants His babies and toddlers to be healthy and beautiful. God wants to try hard to prevent birth defects and other problems that toddlers and children encounter. God loves all our children all over the world. God hopes that our children will live in a better world than we have lived in.

We will all answer to Our One True God as part of the process of International Unification. God created all of us. God continues to create all human and nonhuman life. God created us to be a single Brotherhood and Sisterhood of Humanity. God dreamed of promoting the creation of the Nation of Humanity when He created us. We are approaching a point in our lives when we will have to understand that God needs us to love all our brothers and sisters throughout the world. They need our help. We should be there to help them. We must work with God to find endless ways to find ways to love and to communicate with our brothers and sisters all over the world.

Unification means that God and the Holy Spirit will give us the authorization to explore the Solar System. The next step for our space exploration program will be to design and to build safe and efficient spaceships that will allow us to explore our Solar Systems. However, we cannot do this by ourselves. We need to get permission from God and from the Holy Spirit to even begin to design the spaceships that will take us to distant planets. We must follow the guidance of God and of the Holy Spirit as we begin to build spaceships with humane living conditions for our astronauts. We need to believe that God and the Holy Spirit can help us to find ways to build spaceships that are powered by electromagnetic forces to help us to navigate our way throughout different parts of the Solar System.

We will be able to stop wrongful deaths. Only God can authorize someone's death. Unification means that all of us will understand that we cannot try to destroy the life of another one of our brothers or sister. Our governments will help us to understand that violence is illegal in God's Universe. Our governments will help us to understand that we should seek psychiatric treatment if we feel like injuring ourselves or like injuring others. God and our governments must help those of us who are violent because they are unemployed and suffering from starvation and dehydration.

We will defeat life-threatening illnesses. God and the Holy Spirit will give us the authorizations to develop successful treatments that will enable us to cure life-threatening illnesses such as cancer and heart failure. We will have the medical technologies that will help our doctors to help our young adults and adults to stop engaging in high-risk sexual behaviors that would lead to an infection of a sexually transmitted disease. We must respect God by avoiding the temptation of engaging in high-risk behaviors that lead to the transmissions of the infections of sexually transmitted diseases.

We will no longer seek to hurt ourselves and/or to hurt others. Our governments must come to understand that we are all human beings that can develop psychiatric disorders at any time. Our goal is to help people that feel like hurting themselves and/or like hurting others before it is too late. We do not want to lose our mentally ill brothers and sisters to incarceration in psychiatric facilities and in prisons. We want to help our mentally ill brothers and sisters to remain with us here on this Planet. We want to help them to achieve success in defeating the demons of substance abuse and mental illness. The governments of humanity will understand this when they finally understand and pursue unification.

Our world governments will come to understand the benefits of pursuing and achieving parenthood. Our governments must learn how to teach our young adults and adults about the benefits of working with God to bring new human lives into the world. Our governments must encourage our pursuit of becoming married and of becoming parents. Our governments must help us to understand that the birth and the development of human life is the goal for our young adults to pursue.

We will all reject violence to solve our problems. Our governments will help us to understand that violence is an abuse of human life that is incompatible with God's existence on the Planet Earth. Our governments will work with God and with the Holy Spirit to stop violence all over the world. We will teach our children and young adults the peaceful confrontation is the best way to solve our disputes with other individuals. The Governments of Humanity will no longer seek to use violence to solve their conflicts with one another. They will look to God and to the Holy Spirit to bring peace between their nations that are in conflict.

Our governments will put an end to substance abuse problems. We will teach our children and young adults to reject substance abuse and to live normal and happy lives. The Governments of Humanity will no longer tolerate the existence of substance abuse with their borders. We will be intelligent by training our children and young adults about the demons of substance abuse and about how to reject those demons. We must stop God's Children from having a fascination with substance abuse all over the world. We must keep our children and young adults clean and sober so that they can live productive lives as adults.

Our schools will no longer graduate students who will face incarceration. Our schools are not designed to teach our students how to be substance abusers and criminals. Training our students to be substance abusers and violent criminals are not the objectives of our grammar schools, middle schools, high schools, and colleges. We should offer criminal-defense seminars and courses to help our students to understand what they can do wrong with a weapon or with substance abuse. We must teach our students that substance abuse leads to incarceration and death. We must teach our students that they hurt God and that they hurt Humanity by hurting themselves with illegal drugs, alcohol, and firearms. It will be a much better world when our students come to understand these things.

Our mentally ill brothers and sister need to get psychiatric treatment all over the world. It is such a tragedy when a psychiatric illness causes someone to hurt themselves and/or to hurt others. It hurts God when one of His mentally ill children faces incarceration because of an untreated mental illness. The Governments of Humanity must work to save the lives of mentally ill young adults and adults that need psychiatric treatment before they do something that is so catastrophic that they must be removed from Humanity. That is a tragedy for God, for the Holy Spirit, and for Humanity.

We will all embrace our relationships with God. We will all understand the types of roles that God plays in all our lives. Our governments will work with us and with scientists wot help all of us to find the God that exists for Humanity in our own lives. Our governments will help us to understand the love that we should have with God. We should understand the love that God has for us. Our world governments should understand the obligations that they have toward God. Our world governments should understand the obligations that they should have to preserving our relationships with God throughout Humanity.

We will no longer injure God and/or reject the presence of God in our lives. Our governments will work with us to understand that we should recognize the Existence of God in our lives. Our governments will understand that we all answer to God. Our governments will understand that God plays a vital role in helping to sustain our survival in the Universe. We must not either ignore God or betray God either as a government employee or as a citizen of a nation on this planet. Our world leaders and the citizens of Humanity must work together to make sure that we can all work with God to preserve the successful conception, birth, and development of human life throughout the world.

Our governments' relationships with God will guide us to avoid failure. Our governments fail when they use violence to solve problems within their own country. That will end. Our governments must work with God to provide food and other essential products to their citizens. Stopping nature from producing food and other types of products that contribute to our ability to stay alive will end. Our governments will succeed in their efforts to cure diseases, provide food to starving children and young adults, and to maintaining an economy that will work to support of their citizens.

We will answer to the wisdom and to the love of God and of the Holy Spirit. Our governments will understand that God and the Holy Spirit love all of us. Our governments will understand that they must cooperate with the love and affections of God and of the Holy Spirit. Our governments will encourage all of us to look to God and to the Holy Spirit for love, guidance, and support during the process of unification. God and the Holy Spirit must work with our governments to help to facilitate the process of unification.

God and the Holy Spirit will work with the governments of Humanity to make sure that anyone that needs psychiatric care anywhere in the world will be able to receive psychiatric treatment. Our governments will try to help those of us that resort to destructive and self-destructive behaviors by working with God to find adequate psychiatric care so that they can avoid committing violent crimes and incarceration. We need to get our brothers and sisters psychiatric help all over the world. That should be one of the goals of International Unification. Mentally ill people need to understand the consequences of attempting to destroy or injure human life through violence. Mentally ill people must understand what God can do to punish them if they try to hurt themselves.

God and the Holy Spirit can authorize us to build new flying vehicles that can fly much faster and much more efficiently than what we have now. It would be much easier for all of us to reach each other if we were to have such an airship.

The flying vehicle would be powered by a Clean Energy Generator and by other electromagnetic forces. It would be able to pass through time zones much faster than any other passenger airship has ever been able to do so. It would be cost effective since it would be powered by a Clean Energy Generator that would produce an endless stream of power by itself.

Conclusion

Our governments answer to our One True God. Our governments have an obligation to work with God and with each other to deter conflict and to deter the expressed need to hurt our brothers and sisters in other nations. We have an obligation to God to resolve our conflicts with others by peaceful confrontation with the intent to show love for God by showing the intent to forgive our brothers and sisters in other countries for attempting to hurt us by expressing the need to hurt us. We answer to Our One True God. We have an obligation to solve disputes with other countries by forgiving them for their wrongdoing and by showing remorse for showing the intent to hurt our brothers and sisters in other countries.

Our government leaders must respect The Will of God. We must try to consider doing what God wants us to do to help others both in our country and in other countries. We must be ready to respond to the needs of our brothers and sisters in other countries that are in an emergency out of love for God and for Humanity. We must show compassion and sympathy for the loss of life that may happen in another country because of a disaster. We must respond to God's requests to help Him to help our brothers and sisters.

Our world leaders must rely on their individual relationships with God to serve Humanity as He would want our world leaders to serve Humanity. Our world leaders must turn to their individual relationship with God to find solutions to life-threatening problems inside of their country. God wants to help all our world leaders and their governments to solve domestic crises and international disputes and emergencies. God wants to be a part of the way that our world leaders solve problems within their countries. God wants to be part of the lives of our world leaders because He wants to be part of the way that world leaders help Him to solve Humanity's problems.

Our government leaders must promote the healthy and successful conception, birth, and development of human life. Our governments must give parents all the financial and medical aid that they need to contribute to the productive development of babies, toddlers, children, and young adults. God wants our governments to show love and affection to all the families within a nation that struggle to function as a unit that promotes the development of human life. Our governments must understand that our families are part of Humanity. Our governments must utilize all their resources to help our families to successfully develop human life.

We can no longer resort to using violence and causing wrongful deaths to injure God and to cause suffering to God. We must show love and affection for God by trying very hard to show love and affection for our brothers and sisters here in our countries. Our governments must stop fantasizing about using violence and causing wrongful deaths to devastate and to hurt Our One True God. We must work with God and with our governments to find peaceful ways to settle our disputes with each other. We have nothing to gain by continuing to injure God by carrying out campaigns to injure our brothers and sisters in other countries which would be in violation of our relationships with God.

All our governments must come to understand that we are all brothers and sisters that answer to the same One True God. Our governments must make it clear to the people of the countries that they serve that we are all one family that answers directly to God. We must understand that all our governments answer to God. We must understand that God no longer tolerates dictatorships that threaten to terrorize Humanity. Our governments work to help God of help Humanity.

The main goal for our governments is to work with God to achieve a final lasting peace for all our brothers and sisters. Our governments must work with God and with all other Nations of Humanity to find ways to achieve a lasting peace for all the sons and daughters of Our One True God. God wants to accomplish so many things with our brothers and sisters from all over the world. God is with us everywhere that we go. God lives in every nation on this planet. We need to work with God to end violence and wrongful deaths by uniting with our governments to work with God to help us to solve our problems and to help us to come to love one another.

We must look to the Unification of Humanity as the end of our pain and suffering. We will achieve a universal love between all our brothers and sisters throughout the world. We will join and we will stop making God suffer out of our love for Him. We will show love for God by solving our problems and conflicts without using the intent to injure others or ourselves and without using violence. We will all work together all over the world on constructive project such as uniting with one another to find the God that exists in our lives. The Unification of Humanity may be the end of our suffering and God's suffering.

Space exploration will happen for us when we deserve it to happen for us. God and the Holy Spirit will help us to build spaceships that will enable us to explore the Solar System in the future. However, we must stop hurting God, to stop hurting ourselves, and to stop hurting others before God will give us the authorization to explore our Solar System. We all want to explore the Universe and the Solar System. We must be on good terms with God before He will give us permission to work with Him and with the Holy Spirit to develop the technologies that will allow us to explore our Solar System.

We do not understand that our governments injure God when they try to injure or kill anyone whether they are within the government's borders or in another country. Governments and world leaders must stop finding excuses to injure and to hurt or brothers and sisters because they hurt God every time that they do so. Our governments hurt God when they destroy the lives of their citizens or of the citizens in other countries. Our government leaders must strive to exist on a planet where intelligent human life does not want to hurt God and does not hurt God. That is a good goal for us to achieve.

God, the Holy Spirit, and Humanity will show love for each other when we finally achieve the Unification of Humanity. We will achieve productive goals. We will explore the Universe. We will prolong life. We will improve the quality of life. We will end wrongful deaths. We will cease to continue to injure God. We will stop using violence to solve our problems.

We must understand that our Loving One True God wants our world governments to understand that He expects us to live as one human family regardless of the crimes and mistakes that we have made in the past. We must understand that God wants us to go on with our lives and to be part of His Human Family even when everyone believes that it is not worth it. Our governments must forgive God's sons and daughters for what they have done wrong. Our governments must understand that the Unification of Humanity means that God, the Holy Spirit, and Members of Humanity will forgive each other for hurting each other either intentionally or because of a psychiatric disorder.

Our governments and the United Nations must work together to find ways to stop crimes and violence all over the world. Our governments must teach our children and young adults about the consequences of committing crimes. Our governments must do whatever they can to prevent crimes.
