Introduction

We have always wondered why the universe exists throughout the ages that Humanity has existed here on the Planet Earth. What is our purpose to exist? What kind of constructive role to we play as part of the universe? How did we come to exist and why did we come to exist as we currently exist?

Why did God feel the need and desire to create our Human Family thousands of years ago? Did God feel lonely. Did God feel that it would bring Him greater fulfillment to become responsible for creating and maintaining the members of the Human Family? What does God really gain by supporting our existence in the universe?

The real truth is that God loves to create human life. Therefore, why does death exist? Is death the end of a person's existence or just the start of a new life for the soul of that deceased person that comes into existence as a new born baby somewhere else in the possession of a new family?

God supports all of us by creating our water, fruits, vegetables, dairy products, and meat products for us. God also has mechanisms to create such things as crude oil and natural gas. Do we normally think that God is involved when we see fruits and vegetables that appear out of nowhere? These fruits and vegetables come from seeds and become edible foods a few hours after we plant them. That is the Power of God that creates all non-human life on the Planet Earth.

All things that support the existence of human life come from God. God creates human life because that is His purpose to exist. God feels satisfaction and happiness when He presents a new human life to a man and a woman who express loving intimacy for one another in their relationship. A newborn baby is the greatest gift that any human being can receive from Our Creator.

We all have a responsibility to help God to expand His Universe by achieving parenthood. He depends on us to help Him to achieve his purpose to exist. He needs our help to expand the population of life that he wants to increase in size or all of eternity.

We respect and honor God by accepting the roles of parenthood in our lives. We honor God by loving others, especially our spouse and children. We honor God by being responsible with our sexual behaviors. God does not want to hurt us by infecting us with a sexually transmitted disease because He feels that our sexual behaviors are offensive to Him.

God creates human life inside of a woman's body. A woman's body is God's Factory of Human Life. Women play major roles in the continued development of God's Human Family and of the Universe. Women repeatedly give God a chance to bring new human lives into the world.

The love that parents show for their children is the love that they show for God. God tries to give the parents everything that they need to contribute to the development of a newborn baby into a toddler and then into a child. God rewards parents for their efforts to develop sane and sociable young children and young adults.

The Creation of Non-Human Life

God creates non-human life in order to sustain the existence of Human Life. What is non-human life? What is Human Life? What is the difference between Human Life and non-human life?

Human Life is part of God. Human Life answers to God. Human Life has the power to manipulate the universe to achieve such things as transportation, communication, engineering, medicine, and so on. Non-human life cannot achieve methods of learning and/or communication such as human can.

God approves the inventions that human beings attempt to bring into the world. Non-human life has no way to invent anything. Non-human life does not have the higher intelligence to participate in the intellectual activities of human beings.

However, human beings work with God to create nonhuman life because human beings need to eat food. It is convenient when God creates food for us in our farms and food factories so that we have nonhuman food and products of nonhuman food to sustain our appetites so that we will not starve.

All nonhuman lives appear as images of God. That is true of a pet that may reside in a home, a bird that will fly through the air, or an ant that might be walking in the garden. God is the chief engineer that designs and creates all of the components of nature here on planet earth and at all other places that support life in the universe. This means that we confront God and images of God everywhere that we go from our homes to our cities, streets, and parks.

God and the Holy Spirit manufacture all of our drinking water, natural gas, and crude oil. We will never run out of water even in the event of the most life-threatening drought. God and the Holy Spirit will give us water, natural gas, and crude oil for free from the underground and we will sell it to each other at a huge profit.

God sees his main purpose in life to be the Creator of all Human Life. He considers it an honor to take the responsibility to create human lives inside of His Factory of Human Life inside of a woman and to oversee the development of a new human life. God finds great fulfillment in the role that He plays in the creation and development of human life. The greatest satisfaction that God could ever enjoy would be to preside over the creation and development of all of the members of His Human Family from the time that they are born to the time that they achieve parenthood and beyond.

God guides us so that we can continue to find the resources and materials that we will need in order to remain in existence here on the Planet Earth. God guides and teaches us as to how to manipulate and to use nonhuman life to sustain our own lives here in His Human Family. God teaches us what we have to do so that He can easily create the fruits, vegetables, meats, dairy products, and other foods that come from nonhuman life. We can take these gifts from God in nature and distribute these as foods for all of our brothers and sisters in marketplaces throughout the world.

Do we think about the fact that God created a banana while we are eating one? We should always understand that all nonhuman living creations come directly from God. We will never know how God creates a fruit or a vegetable. That is good for God but disappointing for us.

What Is the Purpose of God?

God is the chief engineer that creates all human and nonhuman life. God is the Force in the universe that sustains the existence of the universe. God's purpose for existing is to create and to sustain all human and nonhuman life in the universe. God is responsible for continuing to sustain the existence of the Universe.

Another purpose of God is to listen to our grievances and concerns. God creates secret mechanisms in order to help all of us in our time of need. The purpose of God is to help all of His Human Children to resolve their problems and to live the happiest lives that are possible for them.

God is responsible for allowing all human beings to be able to communicate with one another. God guides our inventors and engineers to create powerful communication devices that allow all of us to communicate with our brothers and sisters throughout the world. God is responsible for communicating with us when we need guidance and support. God helps us to repair our relationships with our loved ones when something has gone wrong. God helps others to communicate with us when we need guidance and support during a difficult time in our lives. God helps us to understand that we are all part of Humanity and that we are all Part of God by allowing us to communicate with Him and with each other.

God wants the destiny of humanity to be that we will be safely be able to explore our solar system and our universe in powerful spaceships. God wants His purpose to be that His Human Sons and Daughters will explore His Vast Universe with His help, guidance, and authorization.

God's purpose is to show many types of love and methods to resolve our problems when He knows that His children are in trouble. He always wants to intervene in our lives to try to save us from pain, suffering, and failure. He wants to be a part of our relationships with our loved ones so that those relationships will succeed. God suffers when a marriage disintegrates and falls apart. God's purpose is to try to save loving relationships from collapsing and to preserve all families that are or are not doing well.

The Purpose of God is to show love for us through the love and caring that others show for us. God guides our parents to show love, affection, and caring for their children when their kids drift into a life-threatening crisis in school. God guides our doctors to help to cure a patient from a serious disease when they are sick. Such healing powers come from God. Teachers work with God to help their students to grasp their coursework so that they can learn and progress through their education. God shows love for us by guiding others to help us.

God is there to guide us through the good times of our lives and through the bad times of our lives. God teaches us how to become successful in school, work, and relationships. The purpose of God in our lives is to be able to receive guidance from Him so that our lives will produce positive and constructive accomplishments. God is there to hold us back from doing something that is wrong. God is there to help us to do things the right way. God is there to help us by being our best friend.

God is a friend that watches over us no matter what we do. God sees us whether we are doing something good or whether we are doing something that is bad. God watches out for all of us. God's goal is to continue to sustain us in loving relationships with our family members and to support us as constructive members of the communities in which we live.

What is the Purpose of the Holy Spirit?

The Holy Spirit is an entity of higher intelligence that worked with God and Jesus Christ to achieve the mission of bringing down the Roman Empire. The Holy Spirit helped Jesus Christ to perform numerous miracles. It was involved in the Immaculate Conception and in the Resurrection. The Holy Spirit was involved in helping Jesus to convince the citizens of the Roman Empire to reject the false gods of Rome and Athens and to accept and to worship the One True God of the Jews.

The Holy Spirit is a force that watches over all of us. The Holy Spirit gives us guidance, support, training, and intuition to function in our daily lives. The Holy Spirit watches everything that we do. They have all of us under surveillance. They reward us for doing good things.

They turn us into the authorities and prosecute us for committing crimes especially when we think that we can get away with committing such crimes. The Holy Spirit worked with God and with Humanity to create our Criminal Justice System. The Holy Spirit has a very strong influence over the way that the Criminal Justice System operates. The Holy Spirit tries to make sure that no one can get away with committing crimes.

The Holy Spirit represents us in front of God. It helps God to forgive us for our crimes and sins. The Holy Spirit works with God to reform all of us after we have done things to hurt ourselves and to hurt others. The Holy Spirit gets doctors and law enforcement officers involved whenever It feels that a person is a threat to themselves and/or a threat to others. The Holy Spirit is part of God and is part of Humanity.

The Holy Spirit seeks to protect us from harm, especially from life-threatening harm. The Holy Spirit also asks for our help to save our fellow brothers and sisters from harm as well. The Holy Spirit can foresee disasters before they happen. The Holy Spirit can help us to understand how to prepare to face life-threatening conflicts that we will be facing in the future.

The Holy Spirit helps us to understand the difference between right and wrong. It is a process that begins in early childhood when the Holy Spirit begins to coach a young child about what are acceptable and unacceptable behaviors. Young kids and their families do not know when and how the Holy Spirit will show love for them. However, the Holy Spirit is always there to teach our kids what behaviors are acceptable and what behaviors are unacceptable.

The Holy Spirit works to convince God and the Criminal Justice System to be merciful with those children, young adults, and adults that have sins and crimes. The Holy Spirit can guide behavioral health professionals, trial lawyers, public defenders, and prosecutors to help unfortunate people that have hurt themselves to get a second chance to rebuild their broken lives.

The Holy Spirit encourages us to learn about the Great Prophets and to try to connect to God through prayer every day. The Holy Spirit helps our kids to welcome the Spirit of God into their lives and to accept God's guidance and to fulfill the will of God.

The Holy Spirit works with God to help to maintain the existence of the Human Family by working with God to make sure that Humanity will always have the essential components that it will need to work with God to create, to develop, and to teach the difference between right and wrong to all of God's Children.

What Is the Purpose of Humanity?

The Roles of Our Relationship with God

God creates all human beings in His Image and Likeness. One of the purposes of Humanity is to give God His own identity. God wants to create human life and to develop human life because that gives Him a purpose to exist.

God loves His human family. God loves all of us. Part of our purpose to exist is the need that God has to love all of us. That means that God enjoys helping couples to give birth to all of us. It means that God enjoys helping parents and married couples to conceive, to give birth to human life, and to develop human life.

The love that God has for His newborn children is the love that God has for all of us. The love that we show for God by agreeing to work with a partner of the opposite gender to help God to achieve His purpose in life and to work with Him to help us to achieve our purpose for existing means that God will feel fulfilled and honored by His son and daughters of His human family.

The purpose of humanity is to persistently achieve the conception and the development of human life. Our purpose is to work with God to develop human life. Our purpose is to help God to achieve his purpose in the Universe as part of His Creation.

God would be lonely and without a reason to exist if we as human beings were not in existence. God needs to love us and to support our existence in His universe in order to help Humanity to achieve its purpose to exist.

The Purpose of Humanity is to form a partnership with God that will contribute to the conception and the development of human life forever.

We must understand that God needs us to part of His life and that we need God to be part of our lives. The mutual interactions between human beings and God give both God and human beings the ability achieve each other's purpose in life.

The purpose of humanity is to work with God and with the Holy Spirit to resolve our conflicts and problems by accepting and using the love that God has for all of us to achieve a lasting peace for all of us. Our purpose as part of God's universe is to resolve conflicts between ourselves peacefully and without resorting to violence and the misconception that we can solve our problems by seeking to injure or to kill our brothers and sisters throughout the world.

The purpose of humanity is to find the Love of God that exists in our lives. We must answer to God and to the Holy Spirit when it comes to understanding the difference between right and wrong. We must be sensible. We cannot betray God and our brothers and sisters throughout God's human creation by enjoying a detachment from God that would justify behaviors that are destructive to ourselves and/or destructive toward others.

The purpose of humanity is to love the God that created us and that sustains our existence in his universe. Our purpose is to work with God to conceive and to develop human life.

We are All Part of the Existence of God

The Spirit of God lives inside of all of us. Images of God exist all around us. We are all part of God. We are all part of a network of a higher power. We also live in the Spirit of God throughout the universe.

Our spirit lives in the Spirit of God. We all have a place in the existence of a higher power. We exist as part of God and as part of the Holy Spirit because our human existence depends on our relationships with God and with the Holy Spirit for our survival.

We all answer to God and to the Holy Spirit. We all enjoy a lifelong attachment to God and to the Holy Spirit. We receive guidance and support from God when we are part of His Spirit in our lives.

God wants us to understand that we are part of His existence. God wants us to understand that we are part of His Soul. We are part of His life. We are part of the way that he supports the existence of all human and nonhuman life in the universe.

We encounter God within ourselves and within others whenever we talk to someone. We see that image of God in another person or persons when we have a simple conversation with him, with her, or with them. We see the Spirit of God when we see newborn baby and/or a toddler. We see how the Spirit of God develops young babies and toddlers into fully functioning children.

God creates and sustains the existence of plants and animals in order to support our existence. We always have food to eat because we work with God as part of nature to produce the food and fluids that we will need in order to be able to food and beverages to eat and to drink every day.

We do not normally think about our relationships with God and with the Holy Spirit when we go shopping for food. However, we work as Part of God to create and to develop food in order to maintain the entire human family. We do these things because we are part of God.

Conceiving and Developing Human Life

God creates all human life. However, God wants us to be part of the way that He conceives human life. He wants to create human life by responding to the love and intimacy that a man and a woman will share for each other in a loving relationship.

God wants us to participate in the creation of human life because that is what He means when He says that we are all part of God and that we are all part of His existence in the Universe. God wants to respond to the love that a husband and a wife have for each other when they share sexual intimacy with one another by presenting them with the conception of a human life and with the birth of a human life. It is the greatest gift that a husband and wife can receive from God when they receive the gift of a new human life that comes from God after they have shared loving intimacy with each other.

God needs all of us to work with Him to participate in the creation and the development of human life. God works with us to develop a newborn baby with no capacity to function at all into a toddler that can walk, that can talk, and that can eat, and that can understand that he or she is part of God's human family and is part of God's creation. God works with the parents of a baby to help babies to respond to the love and affection of the human family that is overwhelmed with happiness when we all welcome a new human life that comes from the loving intimacy that a man and a woman share in the presence of God.

Our Obligation to Develop Human Life

We all have an obligation to God and to his human family to work to develop human life at all stages of the development of human life. Parents have to work with God in order to understand how to work to develop their young babies and toddlers. God acts as a go-between force between a baby and his or her parents. God helps the parents to understand a baby's thoughts, desires, issues, grievances, and concerns. God helps a baby to understand how to communicate with his or her parents even before he or she has the capability to learn how to talk.

God trains, develops, and appoints numerous people in careers that are concerned with helping parents to develop their new human babies. Daycare centers have therapists that help young babies and toddlers how to achieve essential social skills by challenging those kids to interact with toddlers of their same age group. God helps toddlers to learn how to talk with the help of parents, family members, and daycare workers.

God allows parents and other persons that care for babies and toddlers to listen to the thoughts of a baby or toddler even before these babies can talk. God begins to communicate with newborn babies right after a mother gives birth to the baby. God teaches the baby to respond to the love and affection of his or her parents and loved ones. God teaches the babies how to drink formula and to eat baby food. God works with the baby's parents, family members, and caregivers to be able to be responsible in the way that they will feed food and fluids to the newborn baby.

God want us to be involved in the creation of human life. He cannot create human life without working with a man and a woman that show loving intimacy for each other. We, on the other hand, cannot develop human life without the help of God. It is our obligation to work with God to work with Him to develop human life. This is true because God has given us the opportunity to live as part of His universe. We owe it to him to help other human beings to share the same happiness that we have as part of God's universe with other newborn human beings.

The abilities to conceive and to develop human life are part of our relationship with God and they are part of our obligations to God. God is a factory of human and nonhuman life. He loves to create life and to make life work. The way that He creates life may not always be perfect. However, He tries hard to conceive and to build healthy human beings. We have to be part of that effort to help human beings that have problems after conception and childbirth to overcome their defects and illnesses so that they can be as constructive part of humanity as is actually possible for them.

God coaches our doctors, psychiatrists, and psychotherapists in order to help them to understand how to work with Him to cure disease and to resolve issues that contribute to the disabilities of all human beings. Our psychiatrists and psychotherapists work with God to try to keep those of us with behavioral or psychiatric disorders out of incarceration. Psychiatrists and psychotherapists also have an obligation to develop human life since it is God Himself that has chosen them to pursue a career where they will have the opportunity to save people's lives. These specialists would develop our kids and young adults to try hard to not develop into individuals that would pose a threat to themselves and/or a threat to others.

Our educators also work to develop our toddlers, children, and young adults into human beings that can function as constructive members of God's human family when they become mature enough to understand their obligations to God and their relationships with God.

Existing without Causing Pain and Suffering

Our role in life as human beings and as the offspring of God, who is our Supreme Being and Creator, is to be a constructive member of His human family that would bring nothing but peace and happiness to Him and to all of our brothers and sisters.

However, some of us become ill and cause suffering for God, for our loved ones, and for Humanity. We must understand that those that cause suffering for Humanity are gravely ill and that they most definitely suffer from severe and chronic psychiatric disorders. We must understand that people that are destructive to themselves and that are destructive to humanity desperately need intensive psychiatric care, psychological counseling, and religious orientation.

God does not create evil human beings. It offends the existence of God to accuse Him of creating evil and/or developing evil in any human beings that He will create and that He will develop throughout a person's lifetime. God does not promote the type of thinking that leads to destructive and self-destructive behaviors in human beings.

A human being's detachment from God is characterized by rejections of any efforts that God will make to communicate with a human being. A human being that is detached from God loses track of what God has taught us to be legal and not legal. A human being that is detached from God either does not understand the consequences of his or her destructive behaviors or is so detached from God that he or she does not understand that there are any consequences in what he or she is doing at all.

It hurts God when He has to discipline us when any one of us has to make the decision that we need to hurt someone or that we are justified in our need to hurt someone. God only wants to show love and affection for all of us. He does not want to inflict pain and suffering on any of us for any reason. However, some of us become detached from God and disrupt the human community with crimes that cause immense suffering for all of our brothers and sisters throughout the world. God has no choice at that point. God must punish those that have caused pain and suffering for our brothers and sisters throughout humanity.

Our goal is to teach our kids and young adults about the difference between right and wrong from the first day that they enter elementary school. We must encourage students to establish a direct line of communication with God. We must help our students to understand what a detachment from God is and the consequences that will follow an effort to achieve a detachment from God.

We must help our students to understand when they should seek psychiatric treatment and psychological counseling when they feel that they are a threat to themselves and/or a threat to others. We must teach them the consequences of committing crimes that would contribute to the suffering of the entire human family.

Our goal is to work with all of our brothers and sisters throughout the world to achieve an existence on the Planet Earth that is free from pain and suffering that may be caused by anyone's detachment from God. We must help any of our brothers and/or sisters to understand that we are ready to give them medical treatment and spiritual counseling so that they will not destroy themselves and to devastate humanity with their efforts to hurt themselves and to hurt us.

God has to play a big role in helping us to help our brothers and sisters that believe that violence solves problems. God can help us to help our brothers and sisters to give up on violence and sadness.

God has the Same Emotions as Humans

God has created us in His Image and Likeness. God has created us to have the same feelings, emotions, goals, and ideas that He will have. This is true because we are all Part of God. We all function as part of a higher existence. We all play an individual role as part of an overall purpose as part of the Supreme Being that we call God.

God suffers when we suffer. God is happy when we are happy. God is angry when we are angry. God feels exploited when we feel exploited. God can identify with us whenever we feel a wide range of different emotions. God is there to help us when we feel sad, hopeless, lonely, and/or defeated.

It seems that Humanity's suffering will never end. It seems that God's suffering will never end. We can imagine what God has to deal with when He deals with murders, suicides, and violence practically every day of the year. We wonder how God tolerates His pain and suffering. Is it true that God shares the same grief and emptiness that we share when we experience when we face a natural death or a wrongful death? We cry when we face death. What happens when God cries?

We all should wonder how God copes with His grief when He has to deal with the problems in His Creation. Does God see a psychiatrist? Does God see a psychotherapist? Does God get help from a spiritual counselor? Who helps God in His time of grief? Are we insensitive to the way that God suffers over what we do to ourselves and over what we do to each other?

We can help God to emerge from sorrow and grief by responding to His grief counselor, His psychiatrists, His psychotherapists, and His religious leaders. We can share in His grief and work hard to correct the problem that led to a wrongful death. We must have sympathy for the grief that God feels when we experience the grief that we feel.

We share the greatest happiness with God when a baby is born. It is a miraculous event that helps Him to work with the family of the baby to overcome the grief that He suffers when He deals with the violence and the suffering that supports within this human family. The presentation of a baby to his or her parents is a feeling of happiness that God feels repeatedly. This is how God copes with violence and wrongful deaths here on this Planet Earth.

Our kids do not notice it when they have to respond to God in order to function. God is part of the lives of all of our kids. God teaches our kids to feel the same emotions as all human beings. God teaches our babies and toddlers how to express different types of emotions. God tries to explain what types of emotions that a baby or babies will be felling to parents if they are or are not confused by a baby's behaviors.

God works with parents to help babies and toddlers to understand how to express the same emotions that God and all human beings express on an everyday basis. We have to understand that we feel the same emotions as God because God created us in His Image and Likeness.

God has a hard time in trying to show His Human Family exactly how he feels when good things happen and when bad things happen. God is always with us to guide us and to help us to respond to His anger, His love, and His other emotions. We do not necessarily always know that. That is because God wants us to have the freedom to do good things and to do bad things. That is the ultimate test that we face when we are part of His universe. We must face the consequences of our actions.

The War Against Evil

We define evil as a human effort to persistently destroy and to incapacitate human life within God's human creation. Evil is symptomatic of an illness within Humanity that gives certain human beings the idea that their efforts to injure and to destroy human life are justifiable and that the consequences of such actions are acceptable.

God has been trying to fight and to destroy evil for thousands of years. What kind of an existence would God want for His human beings? He would want an existence here on the Planet Earth that would be free of violence, free of personal injuries, free of death, and free of crimes. God must always ask the same question. "Why is it that My human children do not understand that I as God will not tolerate violence and crimes and that the consequences for committing violence and crimes will be extremely violent and painful?"

Does God create evil? Just because evil exists in the universe does not necessarily mean that God creates mechanisms to try to destabilize and to destroy His creation. God creates, develops, and maintains human and nonhuman life. He does not create and/or support mechanisms that support the process of injuring and destroying human life.

So where does evil come from? Why does God tolerate it and why can't He destroy it? First of all, anyone that engages in acts of evil within humanity are subject to be removed from humanity and to be placed in incarceration for the rest of their lives. God removes such persons that are destructive to human life from humanity and places them in incarceration so that they will disappear from the face of the universe. The soul of anyone that commits suicide in the process of destroying human life is subject to indefinite periods of torture in dungeons that are maintained by God to punish spirits that have disrupted humanity and the universe by committing acts of evil.

The existence of evil is consistent with contagious psychiatric disorders that convince human beings that self-inflicted injuries and the destruction of human life are justifiable and that certain persons deserve the sufferings that are associated with wrongful deaths that come from efforts to destroy human lives. These psychiatric illnesses can be linked to depression and to schizophrenia.

The War against Evil should really be desperate effort to get those that feel the need to achieve a detachment from God and to destroy human life to receive intensive psychiatric treatment and psychological counseling. We have nothing to gain by trying to destroy someone who is suicidal to the point where he or she is contemplating hurting himself and/or others. We must try to find these people and to work with God to get them help.

God cries and suffers when He loses a suicidal person that is very severely ill with a psychiatric illness to a suicide or to an altercation with law enforcement. God feels the pain of His human family when a suicidal person that has no way to reach psychiatric care decides to destroy the human life of others while destroying his own life. God shares in the grief and agony of His entire human family when they have to cope with such a tragedy.

This is not a fight against evil. This is a desperate effort to get help to those who are a threat to themselves and are a threat to others. We must feel sympathy for God, Humanity, and our suicidal brothers and sisters that so desperately need psychiatric medical treatment from all of us.

How Do We Fight Evil?

We must devise ways to stop evil from continuing to develop from within God's creation. We must work with God to find a way to break the cycle of the way that evil continually captures the fascination of our children and young adults. We must help our young adults about the consequences that will follow them if they resort to cooperating with evil to break laws, to injure life, and to destroy life.

Our children and young adults have to come to understand their relationship with God. They can do this in many different ways. All of our children and young adults should seek an attachment to God through the pursuit of their individual religious faith. Our children and young adults must work to understand the messages, the missions, and the accomplishments of the great prophets of Judaism, Christianity, and Islam. We should groom our children and young adults to show respect and dignity to God by helping them to understand the Laws of God as they were expressed by Our Great Prophets.

We must teach our toddlers, children, and young adults about the importance of establishing an Attachment to God. That means several things. They should pray to God. They should talk to God every day. They should always ask God the same question before they do anything for the first time. "Am I doing something to hurt myself or to hurt others by trying to do this?" We should teach our children and young adults to understand God's response to that question and to accept guidance from God.

We cannot promote the existence of a detachment from God in some of our schools while promoting an attachment to God in other schools. All students have an obligation to God and to Humanity to achieve an attachment to God. In no way are any of our schools supposed to encourage our students to ignore the existence of God. Ignoring the existence of God hurts our students and promotes antisocial and destructive thinking and behaviors.

We have to teach our sons and daughters the difference between right and wrong from the beginning. That means that they have to understand right behaviors from wrong behaviors right from the toddler years. All of our students must understand the consequences that await them if they become a threat to themselves or if they become a threat to others. All of our students and their parents and/or guardians should seek immediate psychiatric counseling for any students that pose a threat to themselves and/or to others.

We must show our young adults the end result of their bad behaviors by showing them movies about what life in incarceration in juvenile detention centers and correctional facilities is like for inmates. We should show them what life is like to be a drug dealer on the streets. We should give them tours of prisons and correctional facilities to show them the life that awaits them when they choose drug dealing as a career.

We must show them the ultimate consequence of using a gun. Our young adults must understand that a weapon such as a gun can only serve the purpose of severely injuring others. They have to come to understand the consequences of using a gun to commit a crime. That includes everything from armed robberies to murder. Our young adults have to understand that there is no excuse for owning a gun since it is a ticking time bomb that could go off at any moment. That could mean long-term prison time for whoever owns it.

How Humans Show Love for Each Other

We have an obligation to our Supreme Being to love Him and to respect His dignity and the kindness that He shares with all of His human children. We show love for God through prayer, humility, by showing remorse after we have made mistakes, and by working with Him to conceive and to develop human life.

Why do we need to show love for our fellow brothers and sisters? It is part of our obligation to God to function as part of humanity. God obliges us to always show love and kindness to all of our acquaintances. That means several things. It means that we help others with the special skills that God has given us. It means that we will help people that are clearly in life-threatening distress. It means that we will show others the difference between right and wrong. It means that we will be forgiving of our brothers and sisters of humanity when they come to hurt us or any of our friends or family members.

It is our obligation to God to care for one another. Our news organizations and reporters show that they care about the members of humanity. The governments of humanity show that they care about all of us. The United Nations cares about all of us. Our religious leaders care and pray for all of us. Our doctors use the special medical powers that God has given to them to heal others as a way of loving humanity.

We must show love for each other by showing sympathy for those of us that are detached from a relationship with God and have become a threat to themselves and/or a threat to others. We cannot hurt God by refusing to show love and sympathy for such persons. Some of us are so ill that we think that we can achieve a goal by inflicting pain and suffering upon themselves and upon others. These are suicidal people that have lost their identity as part of humanity.

We must honor God by trying to help those that are willing to die in an effort to commit genocide against us. We must desperately try to find these people and to help them to understand that there is no excuse and/or constructive purpose for attempting to commit suicide and genocide at the same time. We must work with God to help those that are so mentally ill that they are considering committing suicide while committing genocide to understand that God does love them and that this human race suffers because of how progressed their mental illness has progressed. Our human family has nothing to gain by dropping bombs and missiles on these people. We must work with God to try to save the lives of the poor and desperate people so that this senseless and endless cycle of violence will stop once and for all.

We can make the world a better place when we help to bring mentally ill people that are detached from God to their senses so that God can show them how much humanity and God really love them. These sick people do not need to be called by disgraceful names. They do not need to be named as evil. They need help from us. They need help from God. We should feel sorrow for such persons that want to put an end to their lives.

Our prophets taught us that we must be willing to forgive others if we will expect God to be willing to forgive us for our mistakes and crimes. We cannot replace an effort to forgive others with deadly force and violence. We cannot continue to aggravate God's grief by using military force against those of us who may be suicidal. We must honor God by resolving our conflicts with one another in a peaceful and constructive way that brings medical treatment and help to those that are less fortunate than ourselves. We should hope that God will bless all of us and that evil will someday disappear.

Working with God and the Holy Spirit

We think about the Holy Spirit whenever we think about God. The Holy Spirit is part of the existence of God. The existence of the Holy Spirit is mostly recognized by the Catholic and Christian Communities rather than by other religions. However, other religions may believe in the existence of forces of angels which may be the same as a belief in the existence of the Holy Spirit.

The Holy Spirit works with God to deal with issues that pertain to humanity. The Holy Spirit helps God to make big decisions about how to reward good deeds, to punish bad deeds, and/or to be patient and forgiving of His human children.

The Holy Spirit supervises the way that scientists and engineers function throughout the world. This is a force that wants to help human scientific endeavors to succeed here on the Planet Earth. It wants to explain how to create inventions that will benefit humanity. It wants to help doctors to treat patients properly with the proper and the most modern technologies.

The Holy Spirit guides our political leaders and our military forces. It also has a strong influence over the operations of the United Nations. This may be true even though most world leaders and intelligence agencies do not notice the Holy Spirit by name.

The Holy Spirit originated as a supreme force that worked with God and with Jesus Christ and God to make their mission successful. The mission of Jesus Christ was to prove that there was only One True God in existence and that the citizens of the Roman Empire should reject the existence of the false gods of Rome and Athens.

The Holy Spirit had roles to play in the Immaculate Conception, Christ's miracles, and in The Resurrection. Jesus looked to the Holy Spirit as a source of guidance and support. The Holy Spirit guided Jesus throughout the different cities of Israel as he would be greeted by huge crowds of Roman Citizens that would hear Christ preach about the existence of a One True God.

The Holy Spirit worked with Jesus to found modern medicine. All of our doctors try to achieve the same healing powers as Jesus Christ had achieved during his mission to bring down the Roman Empire. All doctors work with God and the Holy Spirit just as Jesus Christ did during his three-year mission in Israel. Many doctors do not automatically notice the presence of a supreme force in their lives and in their careers.

The Holy Spirit may also guide members of law enforcement agencies and members of the criminal justice system function as God would want them to function. God and the Holy Spirit founded the criminal justice systems of humanity. God and the Holy Spirit work with judges, prosecutor, lawyers, and law enforcement agencies in order to resolve investigations and to bring those suspects that have committed crimes to suffer the consequences of their crimes and the punishments that are appropriate for their crimes.

The Holy Spirit has all of us under surveillance. It watches everything that happens with everyone on the Planet Earth. People that think that they can get away with a crime do not understand that they are under round-the-clock surveillance. They do not understand that our higher power gives us all of the freedom in the world until it has to punish us for thinking that we can sidestep the criminal justice system and to commit crimes without being detected and without facing the consequence of what we have done wrong.

God's Expanding Human Family

God is a force that creates and sustains all life in the universe. God loves the idea of creating and developing human and nonhuman life. God loves to see a childbirth. God loves to see the happiness that He brings to a husband and a wife when he introduces them to their newborn son and/or daughter. It is the greatest sense of fulfillment that God could possibly achieve.

It is part of our responsibility to understand that the main way that we can bring happiness to God is to work with Him to create and to develop human life. It is our obligation to contribute to the growth of the population of humanity to work with a partner of the opposite gender to bring God the ultimate happiness of building a human life inside of a woman and then introducing that human life to the entire human community.

God creates human life in the dark inside of a woman. It takes him an average of nine months to prepare a child for childbirth. How does he do it? It is an amazing reality about God that we do not understand at all. He creates life out of nowhere. He just makes it appear.

We do not know anything about the processes that happen during a pregnancy. Unfortunately, most expectant parents do not think that God is responsible for creating their newborn child or children. So many parents do not understand the role of God during a pregnancy or even before a pregnancy.

Is it possible to achieve conception if the man and the woman in the relationship are detached from God and are engaged in sexual activity without the intent to work with God to achieve the creation of a human life? Nothing hurts God more than sarcastic sexual activity. A taunt that taunts God with sexual activity that happens even though the partners do not want anything to do with a new human life really hurts God and makes Him angry.

As the matter of fact, there is a whole list of sex offenses that we can commit that are so damaging to our relationship with God, that God would feel the need to do nothing more than to punish us for committing those offenses. That is why sexually transmitted diseases exist. We sometimes fail to understand that sexual activity is a direct connection to God. We cannot just betray God by engaging in sexual behaviors that offend Him. God will punish us if we persist in engaging in offensive sexual behaviors over an indefinite period of time.

God expects us to be responsible and respectful with our sexual behaviors. The main purpose of sexual activity is to work with a partner of the opposite gender to achieve the conception of human life. There are times when God will deliberately cause a birth control device to fail which will result in an unplanned pregnancy. Sometimes, God will be so angry that he will cause the mutual transmission of a sexually transmitted disease from one partner to another partner.

Our goal is to respect God with our human behaviors. That means that we should engage in sexual activity in a monogamous relationship. The primary motivation for sexual activity should be to achieve the conception of a human life.

The couple that is engaged in sexual activity without the intent to conceive should be prepared to fight off the consequences of their sexual behaviors.

Why does God Exist?

God Exists to Manage the Creation of Life

The purpose of God's existence is to manage a universe of human and nonhuman life. There are an infinite number of human lives and nonhuman lives in the universe. The purpose of God is to maintain the existence of all human and nonhuman life.

God creates nonhuman life to support human life. God creates fruits and vegetables which appear out of seeds so that we can have food to eat. God creates animal life so that nature can give us additional food to eat.

What is the difference between human and nonhuman life? Nonhuman living beings do not have the ability to manipulate the universe through science or to build an emotional relationship with God. Human beings have the ability to answer to God and to manipulate the universe through interactions with a higher intelligence, science, education, and engineering.

God exists to love all of us. That means that God wants His universe to support our existence as human beings indefinitely throughout time. That means that God provides us with food, drinking water, sanitation, breathable air, oil, natural gas, electricity, wood, and other substances from nature such as salt and coal.

God would never allow any of us to run out of drinking water or of crude oil. The air that we breathe would never be poisonous. We would never run out of trees that supply us with all of our wood and paper products. We would never run out of cattle and other animals so that we will always be able to eat processed meat products. God keeps the sun in existence so that our climate can sustain human and nonhuman life.

What would be the purpose of insects and sea life? God is a mechanism that likes to create infinite types of life forms. He likes to create creatures that can fly. He creates sea creatures. He creates jungle creatures. He creates rodents and insects. It is his right to create and to maintain as much nonhuman living beings as He would like to create and to maintain in His universe.

The real question for us is whether there is intelligent human life elsewhere in the universe. Some people believe that it is possible. Some people reject the idea. Only God knows for sure whether we as human beings stand alone as the only intelligent life forms in the universe.

God probably manages living beings in other solar systems. We may someday discover what types of life really do exist in different sectors of the universe. How many planets have a presence of God that can support the creation and maintenance of human and nonhuman life? Only God knows the answer to that question.

God exists to keep human and nonhuman life in existence forever. Human and nonhuman life will exist forever, Human and nonhuman life will never disappear. God is an eternal force that will support the existence of all life forever.

Will God continue to support human death? That is a good question for all of us. Death happens for a reason. It is hard to say whether death is the end of a human being's life or if it the start of a new human life through reincarnation somewhere else. God has promised us eternal life. Only God knows the truth about the dynamics of death.

The Universe Needs a Manager

The universe is a very complicated mechanism. Much of the universe supports life and much of it does not support life. There has to be some being or supreme force that can oversee the operations of the universe so that it can adequately sustain the existence of all human and nonhuman life.

God is the manager of human and nonhuman life. However, is God the manager of the universe? Is God responsible for the way that the universe operates. Does God have a partnership with the universe that he uses to create and to maintain the existence of all life? Is the universe part of God? God is a living being. Is the universe a living being?

Scientists work to create theories about how the universe functions. God is a living being. We may find a moon that orbits the Planet Mars that has no life. We could not automatically assume that the moon is part of the existence of the One True God since it is a lifeless sphere.

The Spirit of God may live within the workings of the universe. God can access different parts of the universe whenever he needs to do so in order to achieve a goal that has to do with His mission to create, to develop, and to maintain non-human life and human life.

It is possible that God really only exists in parts of the universe where human life and nonhuman life actually exist. We can travel to Mars. Mars is a lifeless planet. There is no evidence that God needs to exist there. God will have a purpose to exist there once humans penetrate the atmosphere of the Planet Mars in a spaceship.

Nonhuman life should only exist in solar systems where God needs to support and to maintain human life. He creates plant life and animal life to maintain the existence of intelligent living beings. Is the Spirit of God present on planets that have nonhuman life and that are not supporting human life? We cannot know for sure. It is possible that God might be preparing that planet for a human visitation sometime in the distant future. That might be the rationale behind maintaining nonhuman life on the planet.

God, as the Manager of the Universe, guides all of our scientists and engineers to understand how to create inventions that would be compatible with the way that the universe functions. God and the Holy Spirit seek to guide our scientists and engineers frequently. God wants to help humanity to reach greater achievements by having a better understanding about how to create inventions that are compatible with the universe.

Does God use storms and natural catastrophes to punish humanity for being destructive toward human life? We wonder if God has control of our climate here on the Planet Earth. Is a violent hurricane that makes landfall on a beach of a country an effort of God to punish humanity for testing His patience once to many times? We do not exactly know. We should pray that one-day modern science will be able to have influence with the upper atmosphere so that we may stop destructive storms from continuing to punish nations all over the world.

God may actually be part of the universe or He may be a bystander that only uses parts of the universe when He needs to use them when He needs to support human and nonhuman life. God may be the Manager of the Universe that can control everything that the universe does. God and the universe may be the same thing. That is something to think about.

God Exists because Humans Need to Exist

We all have a purpose to exist. We need God to continue to exist. We need to exist as part of creation. That means that we must depend on God to exist in order to find a way to justify our existence in the universe.

God's existence would not have much of a purpose if human beings did not need to exist. We need to exist as human beings because we need to give God a reason to exist.

We need to work with God for everything that we do. That is especially true when we are born and when we want to become parents. Babies need to come into existence. That is another reason why God exists.

Our scientists and engineers can achieve great things with the help of God and of the Holy Spirit. We need to look to God for the help that we need in order to continue to achieve higher and greater things. That is why God exists.

We need God and the Holy Spirit to guide our doctors and medical professionals in order to make sure that all of us get the highest quality of health care that is possible. We need our doctors to look to the expertise of our creator to help them to make the right decisions about our medical care every time that it is necessary.

Our teachers need to exist because of their determination to educate our students and to prepare them to achieve the destiny that God has chosen for them. All of our educators need God to exist.

We are a human family needs to exist in this universe. That is why we need God to exist so that He can support our existence throughout time.

We Need to Fight Evil

We need to exist in a universe that is free of evil. We need to exist as part of God in order to find an eventual way to end the damage that comes from evil and to bring humanity to a final peace with God.

We need to give God a purpose to exist because we are part of God that is committed to finding a final confrontation between humanity and God. We must show God why we need to exist as humans. We must show God the benefits of maintain us in existence. We need to prove to God that we will be at His side as we will one day finally defeat evil in His creation.

God Exists because we need to defeat evil in creation. We need leave violence and devastation behind us and to achieve the Kingdom of God on Earth. We must worship God forever when the day will come where all of humanity will answer to God after human pain and suffering has ended for all human beings in the universe and evil is finally defeated.

God exists to rid the world of evil. God exists to eventually establish peace and tranquility for all of humanity here on the Planet Earth. God exists because he wants the creation that has come from Him to be free of pain and suffering forever. God exists because He wants to defeat evil. God exists because He wants to put an end to wrongful deaths and to death itself. God exists because the universe needed to A supreme being to creates and to maintain human and nonhuman life.

God Reincarnates the Dead

God has promised us that we would be able to enjoy eternal life in His universe. How can that be true if death exists?

God exists to maintain human life forever. Human beings exist as part of God's creation forever. We all deserve eternal life. It is one of God's purposes to exist to give His human children the joys of eternal life.

God is sad when He has to deal with a wrongful death. A wrongful death is a decision that someone makes to end the life of a human being without the authorization of God. Wrongful deaths hurt and disrupt the entire human race.

It is impossible to destroy human life. God does not allow that. The body of a person may disintegrate and can stop functioning. However, the existence of a person's soul is eternal. God can transplant the soul of a deceased person into the body of a newborn baby. It is such a shame that an adult sometimes will have to go through the development of human life all over again from the beginning.

God exists because humanity deserves human life to be eternal. Only God can make arrangements to extend the life of a human soul forever. God does not want to lose any of His human beings. His humans do not just cease to exist.

Humanity has the wrong idea that death is the end of a person's life. God makes the decisions about what happens to a person's soul after it has detached itself from a person's body.

God sends the souls that cause horrible pain and suffering for Humanity to Hell or what is called the Satanic Dungeon. The spirits of individuals that have horrified God and that have terrified humanity will be sent there to have an audience with all of those evil people that have completely disrupted the universe with their acts of evil and horror.

Other souls that are victims of wrongful deaths or of natural deaths are eligible for reincarnation into a new life. They can come back into a new family where they can start all over again as infants. They then can further proceed with the development of human life as toddlers, children, young adults, and adults.

One of the hardest things that we will ever have to do will be to have to live our life all over again because we have been victimized by a wrongful death or by a terminal illness. It is better that we can start over again as a new human being because God does not want us to continue to suffer endlessly in our present lives if that is the case with our situation.

God is the manager of life that ultimately decides who with life and how will die here in this human existence. God has His own reasons for making these decisions. Our human family mourns the deaths of all of our brothers and sisters that die either by natural causes or by wrongful death.

We all have to understand is that God has promised us that we will exist as part of His creation with a guarantee that we will enjoy eternal life. God will make good on His promise to keep all of us in existence in His universe forever.

God is a Factory of Life

God exists because the universe needs a Supreme Being that will know how to manufacture infinite numbers of human and nonhuman life. God exists because He will work with the universe to create, to develop, and to maintain human and nonhuman life.

God plays a unique role in all of our lives. God affects all of us by the way that He manufactures human life and nonhuman life.

We rarely think of God when He creates fruits and vegetables. Fruits and vegetables appear out of nowhere after God decides to create them. God maintains the ecology of our planet so that the planet can produce food for all living beings.

God creates animal life. Animal life is different than human life. Animal life cannot accomplish the same things as human life can accomplish. God also creates many animals in order to give us food to eat. This is another way that God supports our existence in His universe.

The crowning glory of God has to do with the way that He loves to create human life. Every woman is God's Factory of Human Life. God exploits a woman's body to create and to develop human life during its first stages as an embryo and as a fetus. God creates human life in the dark. He relies on the nourishment of the expectant mother in order to have the building blocks that He will need in order to create the human life and to develop him or her into a baby that God can present to his or her parents after childbirth.

Why does God create so many living beings? God is the Chief Engineer of all life. He designs millions of different types of creatures and keeps them in existence throughout the universe. God wants infinite numbers of nonhuman creatures to exist in His universe for reasons that only He can understand.

The existence of all living beings is the reason why God exists. The universe needs a Supreme Being that can design, create, and manage all human and nonhuman life. God exists as the Force that designs, creates, conceives, develops, and manipulates all human and nonhuman life on behalf of our universe. This is the main reason why God exists in our universe.

God exists because intelligent human beings need to feel the love and support that comes directly from our Supreme Being. God exists because we need guidance, coaching, counseling, and sympathy when we try to proceed to accomplish the goals that God wishes that we could achieve for Him.

Part of the way that God guides us has to do with His obsession with working with human beings to conceive and to create human life. God has to work with the universe to create human life because that is the reason why He exists in His creation. He looks to men and women to work with Him to help Him to achieve His purpose as part of the creator of human life and as the manager of human life. God exists as a source of the creation of life in order to further our existence by working with God to develop human life after childbirth.

Part of the reason why God exists is to work with parents to develop a new human life through infancy, the toddler years, childhood, and young adulthood. The development of human life gives God His purpose to exist.

God Exists to Help Us

God exists because we all need help from a Supreme Being when we have to function as human beings. We have to rely on the guidance and support of God and of those who work with God in order to achieve happiness in our lives. God will guide us and will work with us to solve our problems and to achieve a better standard of living if we have faith in His ability to help us.

God helps us to find ways to work with a partner of the opposite gender and with Him to conceive and to give birth to a newborn child. It is the greatest joy that we can experience with our relationship with God when He will introduce us to our newborn son or daughter. God exists to help us to work with Him to create and to develop human life.

God works with us to help us to understand the difference between right and wrong. He helps others to reward us for doing things the right way and for obeying the rules. God tries to work with others to warn us about the consequences of breaking the rules or of breaking the laws. God uses discipline through the authority of others to punish us for our wrongdoing as a last resort when we fail to understand how we are hurting ourselves and how we are hurting others by breaking the rules and committing crimes.

God helps our young babies and toddlers to learn how to talk and how to communicate with their parents. God helps parents to hear their baby's thoughts. God works with parents to teach a baby how to walk, how to talk, how to eat, and how to communicate his or her concerns to his or her parents and guardians. God is a part of the growing process for babies when He works with parents to develop the new human life after childbirth.

How does a young child learn how to read and to understand arithmetic? God is there for our kids when it comes time for them to learn their alphabets and how to count. God is there for them when He needs to teach them how to socialize with other toddlers and children. God is there for them when he will help teachers to teach them to learn how to read.

God exists to guide our children and young adults. God helps our children and young adults to understand the difference between right and wrong. God helps them to understand how to behave properly. God tries to help guide them away from tobacco, drugs, alcohol, and firearms. God helps them to understand the dire consequences that they will face if they break the law.

God guides our teachers so that they can adequately help our confused students as they enter puberty. Our teachers must help our students to understand the dangers of high-risk sexual behaviors such as the transmission of potentially-fatal sexually transmitted diseases and unplanned teenage pregnancies. God wants our young adults to know the truth about high-risk sexual behaviors.

God tries to guide our children and young adults to reject any peer pressure that would encourage them to use illegal street drugs. God feels pain when our young kids and young adults fail to understand the consequences of using illegal drugs and of becoming addicted to illegal drugs. God wants all schools to work with Him in order to save all of our kids and young adults from the demon of substance abuse and addiction.

God exists in our students' lives because he wants them to reject the use of firearms. God should work with educators to teach our kids and young adults to understand the consequences of committing crimes with firearms.

Why Does Humanity Exist?

God Needs a Purpose to Exist

It would be a very empty universe for God if He would have nothing to do but to watch lifeless planets and solar systems. It would be lonely for God to exist without anyone with which to socialize. God would really have nothing to create and nothing to accomplish.

Humanity gives God a purpose to exist. Humanity challenges God to be a Manager of Life that is always meeting the issues and concerns of the human beings which He has created and developed into intelligent living beings. The creation, the development, and the existence of humanity challenges God to achieve higher levels of accomplishments in His Universe.

God needs intelligent living beings to love. What does love mean as far as human beings are concerned? God's love shows up in our lives in many ways. He guides us to find doctors that have healing powers that can help us to defeat illnesses. God can help us to achieve academic success. God can help us to find and to introduce us to a potential spouse. God can give us gifts that will help us to meet our career goals. God can help us to understand His plan for us and He can give us the help and the guidance to help us to achieve that plan.

How do we show love for God? We need to communicate with God. That means that we should pray to Him. Daily prayer helps us to share love with God. That brings joy and fulfillment to both God and to us. We show love for God by showing love for others by helping them in their time of need and by contributing to their wellbeing. We should know when God wants us to use our skills and abilities to help our brothers and sisters that are in distress and desperately need our help.

God has a job to do because He created us. He expects us to function as part of His creation. God's purpose to exist comes from His need to create and to develop human life and to show love and forgiveness for all of us even when we fail him.

God Filled a Void

The universe can be a very desolate and a very empty space. God can be a force that can exist everywhere. However, God might have had no one to talk to. He may not have had a job to accomplish. There may have been a void in His life that made Him sad. He may have felt that His existence had absolutely no purpose. Obviously, there was a void in His life because there was a point in God's life when human and nonhuman life did not exist.

God found a way to create human and nonhuman life at some point in His existence. He created human and nonhuman life to fill a void in His existence. Managing and creating human and nonhuman life in the universe filled that void in God's existence a gave Him a job as the Chief Manager of Human and Nonhuman Life in the universe.

We have come from God and we are part of God. We all play a special role in God's existence. We all work together to fill the void that use to exist in God's life before He found a way to create all human and nonhuman life. We should be thankful and grateful that God will give us the privilege of existing as part of His creation. We must do everything that we can to behave responsibly within God's creation so that we do not make Him suffer while we fill the void that used to exist in His life.

Finding New Ways to Develop Human Life

God knows that there are problems in the way that we develop human life both here on the Planet Earth and in other parts of the universe. God feels frustration when we develop a young boy or girl to have the tendency to break rules, to break laws, and to do self-destructive things such as using illegal drugs.

God may have created Humanity so that he could find ways to stop the mismanagement of the development of toddlers, children, and young adults. We all our free will here. We can do anything that we want to do. However, we must teach our children and adolescents the difference between right and wrong. We must teach them the rules and the laws. We must teach them about the consequences that await them if they break the law or break the rules.

God does not understand why the development of some of His children and young adults will fail. This means that the children and/or young adults might start to resort to committing crimes and/or to engage in alcohol abuse and substance abuse. Some young adults would think about resorting to violence as part of his or her career.

Humanity exists because God has these problems throughout His entire creation. God is desperately trying to solve these problems here within Humanity so that His universe can someday achieve a lasting and eternal peace.

God's main goal in bringing Humanity into existence would be a desperate effort to find ways to develop human life in ways that allow our children, young adults, and adults to enjoy their existence as Part of God and as part of God's creation without injuring themselves, injuring others, and/or injuring God.

A New Beginning with Human Life

It is possible that God tried to create Humanity in other parts of the Universe. Something may have gone horribly wrong. God may have created the Humanity that we exist in order to have a new beginning with the creation, development, and maintenance of human life. God may have just wanted to start all over again from scratch because of the way that He may have failed in his first attempts to create a human existence that failed that collapsed within itself.

God desperately tries to understand why His Human Creation malfunctions all of the time. God tries to understand why evil is a cancer that persistently injures and disrupts His creation. God desperately tries to develop our toddlers and children to teach them to reject the pressures to be threats to themselves and to be threats to others.

God loves all of us no matter what crimes or sins that we commit or that we try to commit. We have a forgiving God that expects us to forgive others if we expect Him to forgive us. We have to understand that God makes mistakes that cause us to do things that are wrong. We make mistakes that cause God to do things that are wrong. Neither God nor Humanity is perfect. We can strive to work with God to achieve perfection. We must understand that we cannot achieve a lasting peace with God as long as we are indifferent toward the pain and suffering that we cause for Him.

We reach God through prayer and through our efforts to love God and one another. We can achieve a lasting peace with each other by making peace with God and by understanding the difference between what makes God suffer and what brings God joy and fulfillment.

Finding New Ways to Communicate

God may have had severe problems with communicating with His human beings in different parts of the universe. Maybe God suffered a major failure there. Maybe God lost His ability to communicate with those early humans. We do not know for sure.

God is always trying to find numerous ways to communicate with us. Part of the reason that we exist is because God has to understand how to communicate with human beings the right way. That means that we would respect the Voice of God when God will attempt to communicate with us. This means that we cannot seek to ignore God. It means that we must be very sensitive to what hurts and to what offends God. We have to be ready to go to God with our concerns and problems. We have to have faith in God that He will help us to resolve our issues so that we can continue to lead a normal life.

Do we hear a voice when God talks to us? Do we hear a thought inside of our mind? How do we know that God is trying to communicate with us? Why would God be interested in having a conversation with one of us? How should we respond to God if we really feel that He is making a strong effort to reach us?

We are all part of God. We all have different ways of understanding our own individual relationship with God. We have different ways to do the same thing which is to communicate with God. There are times when we need to interact with God. There are times when God has to guide us. We should accept God's offer of help if He offers it to us.

We have to believe that we are part of a loving God that needs to communicate with us in our time of distress and crisis. We must show our love for God by working with Him to be a productive member of Humanity.

Finding New Ways of Discipline

The way that God possibly chose to discipline the first humans in another part of the universe may have been a disaster for Him. He may have created Humanity to try to understand how discipline should work. God wants all of us to understand the difference between right and wrong. God wants us to understand the consequences of committing sins and crimes.

God needs to find ways to use discipline to battle evil. God wants this to happen here on the Planet Earth, God wants to study evil. God wants to understand why simple discipline does not stop violent crimes. God wants to understand why our schools fail to discipline our students so that they will have the ideas that they can commit crimes and to go unpunished for committing crimes.

God feels pain when He witnesses an execution. Does the state have the right to break the Sixth Commandment, "Thou Shalt Not Kill?" Is an execution cruel and unusual punishment? What does an execution accomplish as far as disciplining a criminal is concerned? Is there any such thing that God recognizes as excusable murder that is endorsed and supported by God and by the Laws of God?

God is always working to find the final formula of discipline that would help Him to finally reach His kids, young adults, and adults that would be peaceful so that they could avoid incarceration and so that they could remain active participants of God's Human Family. God hates to lose His humans to incarceration. God wants His humans to enjoy freedom, peace, and love. God wants this to be the ultimate goal of discipline. This may be one of the main reasons why God chose to create our existence here on this planet.

Different Approaches to Solve Problems

We encounter many types of problems every day. God keeps track of every problem that every one of us face at every moment in time. God understands our problems. God understands our concerns and our grievances. God understands why we feel emotionally injured when we encounter the stress of a painful problem.

God created Humanity because He wanted to find new ways of reaching human problem and with dealing with human problems. God attempts to formulate solutions to our problems all of the time. God tries to draw people that can help us to deal with our problems into our lives all of the time. God communicates with us to give us feedback about how to deal with problems.

One of the goals that God had for creating Humanity was to be able to eventually formulate some way to help all of His human beings with their problems in a way that would be effective. Obviously, our Supreme Being has been facing setbacks. Our entire human race is completely disrupted. However, we must have faith that God will guide us down a path where we will find final solutions to our problems no matter how complicated or how dangerous they might be.

God does not give up trying to help us to solve our problems. God does not give up on us. He will stand right beside us to bolster our efforts to solve our problems until they are solved.

Humanity gives God the opportunity to look at problems with His creation and to conceive numerous approaches to try to solve the problems. He then tries to help us.

We have to pray and to understand that The Power of the Goodness of God is eternal while the power of destruction of evil will eventually disintegrate and fail.

Finding ways to Destroy Evil

The creation of Humanity was God's response to the existence of evil in His creation. Evil is a cancer within Humanity that seeks to destroy human life and to bring about the downfall of God's universe. God still does not know what He has done wrong when evil seems to erupt all over His creation for no apparent reasons.

One possible solution would be to provide psychiatric treatment and psychological counseling to those that feel the need to destroy themselves and/or to destroy others. We must pray for people that have a progressed mental illness that causes them to be a threat to themselves and/or a threat to others. We must do everything that we can to save such a human being's life by helping him or her to understand that they have nothing to gain by destroying themselves and/or by destroying others.

We must treat evil as a psychiatric illness that represents a human being's complete detachment from God. These individuals belong in psychiatric hospitals if they are fantasizing about committing suicide and/or fantasizing about killing others.

The goal in the fight against evil is to prevent suicides, homicides, and genocides by offering medical and psychiatric treatment as well as life-saving intervention in a diseased person's life so that the potential suicide, homicide, and/or genocide can be prevented by offering help, compassion, empathy, and sympathy to these severely mentally ill people that are causing God and all of us to suffer so much. We have to convince them to seek psychiatric counseling before they try to succeed in trying to destroy themselves and by trying to destroy others at the same time.

Better Cooperation with Parents

God is always seeking better ways to work with parents to help them to develop their babies, toddlers, and young adults. Parents feel that they have a moral obligation to God to accept the responsibility of achieving parenthood. Parents want to help God to expand His network of human beings throughout the world. Parents are supposed to work with God in all stages of the development of their children. God always wants to find better ways to coach and to counsel parents in order to guide them through the process of developing their young kids.

Getting a better idea about how to develop parents and their sons and daughters is one of the main reasons that God created Humanity. God feels responsible for the successful development of parents. He also feels responsible when parents encounter severe problems that hurt their efforts to raise their children properly. God is very concerned and very hurt when parents abuse and/or neglect their kids. God also is very disturbed when parents exist in a detachment from God. That means that they want to raise their children without the help of God.

God wants to find better ways to help parents. God wants to find better ways to help their sons and daughters. God wants to find better ways to get parents professional psychiatric and psychological counseling when they start to have life-threatening issues as parents. God also understands the toll that substance abuse by parents can take on the entire household. God wants to create substance abuse treatment awareness programs that would be designed to stop our young adults and adults from starting to use drugs in the first place.

Parents have to realize that God is always there to help them to conceive, to give birth to their children, and to help them to develop their kids through good times and bad times. They have to understand that God is ready to help them to solve their problems. They have to understand that they should accept God's Guidance out of love for God and out of love for their children.

Working with the Holy Spirit

One of the reasons that God created Humanity was because the Holy Spirit needed to work with God to help Him to develop a new concept of human life. The Holy Spirit wanted God to start all over again with Humanity. The Holy Spirit wanted to help God to understand His options when He would create Humanity. The Holy Spirit helped God to understand that it would be in His best interests to create Humanity.

The Holy Spirit is an invisible force that works with God to watch over Humanity. The Holy Spirit is part of God. One of its roles to advise God about His options during a life-threatening emergency that might erupt within Humanity. God and the Holy Spirit can work with Humanity to deal with dangerous situations that can be a huge threat to the entire human race.

The Holy Spirit needs to work with Humanity in order to work toward the goal of finding a lasting peace and a lasting tranquility all over the universe and especially here on Planet Earth. The Holy Spirit gives God a different viewpoint about how to deal with such problems as the eruption of evil throughout Humanity and the outbreak of war and violence.

The Holy Spirit is an intelligent force that helps to guide Humanity on behalf of God when God feels angry and frustrated over some of the problems that erupt here on this planet. The Holy Spirit does not want God to feel like He will accomplish anything by retaliating against Humanity in this case.

Why Does the Holy Spirit Exist?

An Entity of Higher Intelligence

God created the Holy Spirit to be an entity of higher intelligence. That means that the Holy Spirit is very advanced in the way that it deals with God, the universe, and with Humanity. Its understanding of creation is second only to that of God. The Holy Spirit has a role to play in the way that God supports life all over the universe.

The Holy Spirit has all of us under surveillance. It watches over all of us. That is also true when we think that we are getting away with committing crimes. It looks at the qualities and problems of our thinking and behaviors. It determines what kind of guidance and assistance we will need from it and from God.

The Holy Spirit guides our mathematicians, scientists, and engineers in their efforts to accomplish their goals. The Holy Spirit cares about helping us maintaining our level of scientific achievement. The Holy Spirit guides our scientists and engineers to design and to build creations that work. We definitely depend on the intervention of the Holy Spirit to continue to succeed in the development of our scientific achievements.

The Holy Spirit helps to guide our doctors, psychiatrists, and psychologists to help those of us that are ill. The Holy Spirit tries to help those of us that have life-threatening mental illnesses. Our mental health professionals have to work with the Holy Spirit to deal with the wide-spread epidemic of suicidal and homicidal behaviors that are devastating our human existence at this time in our history.

Our goal is to work with the Holy Spirit to prevent suicide, murder, and genocide. Our goal is to help those of us that are suicidal and homicidal. Our goal is to save peoples' lives before it is too late and we have lost many of them to a suicide attempt and/or a genocide attempt.

God and the Holy Spirit Oversee the Universe

God created the Holy Spirit so that He could have help in His efforts to oversee the development and the maintenance of the universe and all life in the universe. The Holy Spirit helps God to detect problems with life in different star systems and galaxies. The Holy Spirit works with God to counsel Him about what His best chances are for creating and sustaining life in different parts of the universe.

God created the Holy Spirit to help Him to understand how to respond to intelligent life such as the members of Humanity. The Holy Spirit consoles God every time that there is a tragedy from within our human family. The Holy Spirit helps God and Humanity to deal with damage control when a campaign of legal insanity causes suicides and/or genocides throughout the human family. The Holy Spirit helps to guide Humanity through its suffering and through its grief. The Holy Spirit goes into a state of emergency when Humanity has to face a life threatening crises. That is when it guides law enforcement agencies, military leaders, and intelligence personnel.

God created the Holy Spirit to watch over us as human beings. God created the Holy Spirit to help us when we have to face life-threatening crises. God created the Holy Spirit to oversee the way that He would eventually defeat evil in His universe. God depends on advice, guidance, support, and compassion from the Holy Spirit every time that He has to deal with a human catastrophe that involved violence and wrongful deaths. God created the Holy Spirit to be His partner.

The Holy Spirit Investigates Humanity

God created the Holy Spirit to help him to investigate all human life in the universe. Human life seems to always be malfunctioning. The Holy Spirit tries to understand what has gone wrong in each situation that involves the self-destruction of a human being. The Holy Spirit feels the same pain that God feels when the human race is completely disrupted by senseless violence and conflict. The Holy Spirit is God's grief counselor when God feels so hurt and so sad that he wants to give up on us here on Earth.

The Holy Spirit has some very powerful operative here on this planet as part of Humanity. The Holy Spirit has a lot of influence over all of us. Some of that influence comes to us through our relationships with others. The Holy Spirit investigates all of us on behalf of God. God created this force to help all of us.

The Holy Spirit tries to help us to understand that we should reject evil thoughts and evil actions. The Holy Spirit works to repair the damage between ourselves and God when we behave in a way that causes injuries to human life. The Holy Spirit helps us to understand how God feels about the way that we behave and function.

The Holy Spirit serves to guide us through our good times and through our bad times. It does not want our lives to be ruined forever because we have encountered a hardship or a tragedy. The Holy Spirit is a grief counselor and employs grief counselors that can help us to recover from our tragedies and setbacks.

We must remember that a higher power always has us under surveillance. That means that you will face punishment if you commit a crime. The Holy Spirit will turn you in to the authorities.

Guiding Our Relationship with God

The Holy Spirit helps us to understand our relationship with God. It helps us to understand how God feels about the way that we behave and act. It helps us to understand that we should never give God a bad attitude or to make Him feel that we do not care about what He thinks about what we are doing right and what we are doing wrong.

The Holy Spirit helps us to understand what our obligations to God are. It helps us to understand the difference between what honors God and what offends God. It helps us to understand the power of prayer and how prayer can help us when we need help from God the most. It can help us to repair the damage that we have caused to our relationship with God when we have succeeded to hurt ourselves and/or to hurt others.

God created the Holy Spirit to help Him to help human beings what they were doing wrong to destroy themselves because of their conflicts with God. It has to help us to understand where we stand with God after we have shown remorse for our sins and crimes. It also can help us to forgive others who have hurt us and who have hurt others that we have cared about.

Our relationship with God is a complicated concept. We have that relationship because we have to exist in a universe where God supports us and keeps us alive. The Holy Spirit exists to help God to deal with His creation that may be in turmoil at this time. The Holy Spirit exists to help God and to help all of us that are part of the human community.

Guiding the Criminal Justice System

God employs the Holy Spirit to help Him to guide the operations of the criminal justice system. Employees of the criminal justice systems of the world do not think about the influences of the Holy Spirit in the daily routines of their jobs. However, God and the Holy spirit have complex operations within the criminal justice system. That is because no one gets away with committing a crime. Some suspects deserve forgiveness from the courts.

A police officer or a sheriff's deputy may get a feeling that something is wrong with a certain car in a neighborhood. He or she can initiate a traffic stop. It could turn out that the occupants of the car have outstanding warrants. The Holy Spirit can help law enforcement officers to find criminals through traffic stops by actually giving the officer the idea to initiate the traffic stop for that particular car.

Federal law enforcement agents do not notice the guidance of the Holy Spirit when they hunt down and arrest a certain suspect that eludes them. Many of them feel a stimulus that leads them to be able to crack the case and to find the person that is responsible for the crime.

A person might plead guilty to committing a crime. However, God and the Holy Spirit would rather have that person on probation than to be incarcerated. They can pressure a judge in an unusual way to be merciful toward the felon by putting him on probation rather than by sending him to prison.

The goal of the criminal justice system is to reform criminals. The mission is to keep our young adults out of incarceration by teaching them the difference between right and wrong. It is about training our adults about the consequences of becoming career criminals.

The Holy Spirit and God would want to work to prevent crimes through criminal justice training and counseling and training in our schools to resort to incarceration. God and the Holy spirit can work with the criminal justice system to prevent persons from committing crimes rather than by prosecuting them after they have committed crimes.

Working to Solve Problems

A mature young adult can go directly to God and to the Holy Spirit with his or her problems to seek help. God and the Holy Spirit are always available to give our young adults and adults counseling about how to approach and to solve their problems. Any child, young adult, and/or adult can respond to the guidance of the Holy Spirit.

One of the reasons that God created the Holy Spirit was because he wanted an entity of higher intelligence to work with him to lend a helping hand to those of us that would go to God for help through prayer. The Holy Spirit deeply care about our kids and young adults. It would definitely expose our kids to resources and organizations that could help them.

The Holy Spirit can be our best friend during a life threatening crisis. It can help us to find the resources that we will need in order to begin to solve our problems. God wants all of us to drift out of danger and into a peaceful living situation. The Holy Spirit also wants to help us to overcome our obstacles toward living a productive life.

We can start to work on a plan to solve our problems after God and the Holy Spirit guide us in the right direction in order to find those persons that can help us to achieve our goals to overcome our hardships and to live our lives free of conflict. We must always work with God and with the Holy Spirit.

What is the Purpose of Life?

God Intends for a Peaceful Coexistence

Humanity, God, and the Holy Spirit are supposed to live in a peaceful coexistence. However, we have much conflict that is related to the effort to destroy life.

The Purpose of Life is to exist in a peaceful coexistence in which all of the participants of the coexistence, God, Humanity, and the Holy Spirit, give each other a purpose to exist. These three entities work together. However, there is much conflict between God and Humanity. Humanity still feels that it can solve problems by utilizing the destruction of life.

Those of us that understand how God is suffering because of the violence that is causing the wrongful deaths on this planet feel sad for His suffering. Sometimes, Almighty Supreme Being will have no power to stop hatred, violence, suicides, genocides, and the attempt to hold humanity hostage through threats of mass murder and mass suicides.

Humanity seems to have shattered God's dream of achieving a peaceful coexistence with Humanity. What does God do when His human race is driven to believe that suicides and genocides are ways to solve conflicts responsibly? We need to ask God for help. We need to reach the mentally ill persons that are completely suicidal and to start giving them psychiatric treatment and religious counseling. We need to show them that we do care about them. We need to understand that they are not evil. They are extremely ill. They need medical treatment from us, from the Holy Spirit, and from God.

We cannot make conflicts worse by making derogatory and harmful remarks about those of us that are this severely ill. We must be as forgiving toward others as God is toward us. We can solve the problems peacefully by helping suicidal and homicidal people than by resorting to violence.

The Infinite Creation of Human Life

God wants to always create more life on top of what He has already created. It gives all of us satisfaction and happiness when we know that God is a Factory of Life that will be giving our human family new human lives forever.

The purpose of life is to enjoy the happiness that comes from God when we witness and participate in the conception and development of human life. The purpose of life is what God does to give us a purpose to exist by producing an infinite number of human beings for us to love and to care for within our human family.

The purpose of life is to work with God to expand His universe and to contribute the beauty of His human community. It is about taking advantage of the fact that God does nothing better than to create human life. We can reward God for giving us our chance to exist in His universe by celebrating childbirths and birthdays of our babies and toddlers.

The infinite creation of all types of human and nonhuman life gives God, the Holy Spirit, and all of us a purpose to exist for the rest of eternity. The purpose of life is all about welcoming new human lives that are created by God into our human family and to look forward to eternal life with God as our Supreme Being.

Serving God as Part of Our Human Family

Part of the purpose of life is to understand the roles that we will play as part of God's Human Family. We have an obligation to serve God by showing love and caring for others in our family and that we work with. We show love for God every time that we show love for others.

We must all try to show love, compassion, empathy, and sympathy for all of God's children within God's human family. We must try hard to resist the temptation to think of our brothers and sisters as subhuman or evil. We can pray for their souls and ask God to work with those that have the power to help individuals that have suffered a detachment from God because they suffer from untreated and undiagnosed psychiatric disorders and mental illnesses.

We must work with educators to teach our students to fight off harmful thoughts about hurting themselves and about hurting others. We must teach them the basics in school. Math, reading, and science are some of the basics. We should also teach them the advanced ideas. We should teach them to stay away from illegal drugs, alcohol, smoking, and firearms. We should teach them never to have thoughts about suicide or about engaging in violence against others. We must teach them that they should inform their teachers or law enforcement if they have any evidence that anyone that they know is a threat to themselves or a threat to others.

The purpose of life is to preserve life by helping our sick brothers and sisters that feel like committing suicide and killing themselves in the process of killing themselves. We should pray for their souls and for the grief of their victims and the souls of the victims that have passed away because of their untreated and undiagnosed chronic psychiatric disorders.

Working with God to Create Life

We all have an obligation to God to work with Him and with a person of the opposite gender to create a human life or human lives. God responds to a man and a woman that share intimacy with one another by conceiving a new human life in His Factory of Human Life inside of a woman's body. God creates human life in the dark inside of a woman to respond to the love and affection that a boyfriend and a girlfriend have for each other.

God creates human life. However, God wants us to participate in the process of conception because we are all part of God. God expects us to desire a pregnancy when a man and a woman show that kind sexual intimacy for each other. God expects them to have a long-term relationship or some type of commitment to each other.

We participate in the effort to cause a pregnancy because we love God. We know that God wants us to work with Him to add to His population of human beings in His universe. We know that childbirth and the development of human life are part of the purpose of life and are also part of our relationship with God.

Trying to engage in sexual intimacy without the intent to work with God to create human life hurts God. God tolerates that to a point before he begins to do bad things to the person that is persistently frustrating His efforts to produce a pregnancy during sexual activity. The penalties for engaging in sexual activity without the intent to conceive a human life can range from an unplanned pregnancy to the transmission of a sexually transmitted disease. God has warned us for the last time that there are certain sexual behaviors and sexual lifestyles that he will not tolerate.

How Love relates to the Purpose of Life

What is love? Love is a constructive force that exists between ourselves and people that are important to us in our lives. That can include our family members, our colleagues at work, and our boyfriend or girlfriend.

Love is a Force that generates the energy between a man and a woman that convinces them to try to work with God to conceive one or more human lives and to work together to develop those human lives.

Love is a force that we feel from God and the Holy Spirit. God can help us to understand reality when we are confused. God can be a matchmaker that can help us to find the right candidate to be our husband or wife. The love that we have for God can generate the creation of a new human life.

The love that the Holy Spirit has for us can help us to perform in a job. The love of the Holy Spirit can help us to save our marriage if it is in trouble. The love of the Holy Spirit can help us to create inventions and to accomplish wonderful things in schools and at work. Most of all, the Holy Spirit is a force that works to reward us for good behaviors. It tries hard to help us to stay out of trouble and to find solutions to complex problems at both home and at work.

The Holy Spirit can also force us to get help if we need it and cannot recognize that we are hurting ourselves. They can help us to receive treatment for an addiction to a controlled substance or to alcohol. The Holy spirit can try very hard to stop us from hurting ourselves and/or hurting others. The Holy Spirit shows love for us by leading us into programs that help us to receive the medical treatment that we need so that we will no longer feel like hurting ourselves and/or like hurting others.

Removing Evil from God's Universe

The purpose of life is for Humanity to live in a peaceful existence where human beings will no longer feel the need or the desire to purposely injure or to destroy human life in God's universe.

Evil is the persistent disease that convinces human beings to purposely injure human life and to attempt to destroy human life. Evil is an illness that has ruined God's existence for thousands of years. Intelligent life has probably existed for thousands of years. God still has not found a way to release the illness of evil from His creation.

We may be doing several things wrong that are promoting God's frustrations, pain, and suffering. We cannot destroy evil by destroying human life. We are just as bad as the bad guys when we seek to destroy human life just as they seek to destroy human life. We are not reaching out to these people to offer them help and forgiveness for their intent to commit acts of violence against Humanity. They are mentally ill and we should negotiate agreements with them that would give them access to psychiatric treatment and medical treatment. We have the right to call mentally ill persons evil and/or subhuman. Those types of damaging statements can make these diseased people even more depressed and suicidal than they already are. We must pray for these poor people and we must offer God our condolences for the suffering he is enduring at this moment in the history of His human creation.

We also need help when we think that there are people out there that want to kill us for no reason. Paranoia, the idea that people are out to harm us or to kill us for no reason, is symptomatic of a psychiatric condition. These people do not want to hurt us. What they want is for us to recognize that they are sick and to try to convince us to forgive them and to give them a chance to rejoin Humanity.

We Need to Forgive Others

Part of our obligation to God is to be forgiving of our brothers and sisters here in this country and throughout the world for giving us the impression that they want us to live in fear of terror everywhere that we go.

Some of our most notorious criminals in the country, the United States, could have been saved from incarceration if they had been able to access psychiatric treatment and psychotherapy when they first began to show symptoms of wanting to hurt themselves and to hurt others. We just sat back and ignored the warning signs while they would disintegrate in front of us, in front of their schools, and in front of law enforcement agencies.

Do our schools groom certain students to become criminals or to become criminally insane? A lot of people are in prison. It is hard for our society to forgive them for what they have done to us. They are in incarceration for a lot of justifiable reasons.

Our schools can no longer groom our students for incarceration. Our economy is defective when it cannot produce enough jobs for all high school graduates and college graduates. We have to fix our economy and we have to train our students to reject illegal behaviors so that they will live outside of incarceration.

The best way to start to end this global catastrophe is to try to understand that we are dealing with very mentally ill human beings. We must forgive them for having the intent to destroy human life. We must find ways to help them to get the intensive psychiatric treatment that they need in order to understand that individuals that are part of humanity do not have fantasies about suicide, murder, and/or genocide.

Ending Pain, Suffering, and Grief

We have to think about what are the ultimate goals that we can try to achieve to complete the evolution of Humanity. We would like to work with God and the Holy Spirit to end pain, suffering, and grief. The question here is whether we can convince God that we deserve that from Him and from the Holy Spirit.

We do a lot of really bad things that can infuriate God and the Holy Spirit. It is hard to negotiate with them about ending the way that God punishes us for being the way that we are. Sometimes, we do not even know how to say that we are sorry to God after we have hurt someone. It sometimes happens that we cannot say that we are sorry to God and to a court after we have done something wrong.

Asking God to stop punishing us could be biting off more than we can chew, to be honest with you. What we do to God is incredible. We have to think about how we will come to a final lasting peace with each other and with God. God only knows if He is open to negotiate with us about any of this considering what Humanity does to Him on a daily basis.

Nevertheless, we can dream of the evolution of humanity that will finally lead to a lasting and eternal peace with God and with each other. We can pray for that. We can hope that really will be what "The Purpose of Life" will eventually mean to all of us.

We all have to pray to God to show Him that we care about His suffering. We hope that the Holy Spirit will also be helping God during this period of grief. We may ask them to bless all of us.

Conclusion

We are all Part of God. We are all part of the Holy Spirit. We have a higher purpose in our lives here on Earth. Our Purpose for Existing is related to Our Creator, to the Holy Spirit, and to all of our brothers and sisters within our global human community.

The Purpose of Life means that we bond with God in a peaceful coexistence with God where we will achieve the purpose of our lives and the destiny that He has chosen for us. He is the world's most notorious matchmaker. Part of our coexistence with God is when He introduces us to a member of the opposite gender that He feels has the qualities to be a potential spouse for us.

We realize that we have an obligation to God to contribute to the expansion of His universe by working with a partner or spouse to participate in the conception and development of new human lives. We work with God to achieve parenthood. We understand that parenthood is part of everyone's destiny.

We must come to understand that a person or persons that feel the need to simultaneously commit suicide and genocide is severely mentally ill. It is illegal for any human to take his or her own life. God does not tolerate this. We must try hard to forgive such persons for having the intent to kill in the masses by simultaneously committing homicide and suicide.

Using derogatory statements to describe these mentally ill individuals can make them even more suicidal than they already are. Putting them down and further diminishing their egos by calling them names does not accomplish anything.

We must work with God to cure any cancer that exists within our human family that encourages the simultaneous commissions of a suicide and genocide by a single person or persons. We must treat this cancer as an illness without using it as an excuse to fantasize about destroying the lives of those have this illness.

The Purpose of Life is about working with God, the Holy Spirit, and Humanity to achieve a final and lasting peace for all of us and for all of our descendants. We want God's suffering to end. We want our suffering to end. We want life to exist peacefully in God's universe.

We want to work with God to create and to develop human life. We must understand the consequences of infuriating God by engaging in high-risk sexual behaviors. We engage in sexual intimacy when we need to work with God to conceive a human life. Be aware of the danger that exists to your life if you engage in sexual intimacy for any other reason.

We must be aware that the Holy Spirit is part of Humanity. It is an entity of higher intelligence that is watching over us. It is helping God to deal with us right now during this desperate time in human history. We hope that we can work with God and the Holy Spirit to achieve the destiny of Humanity so that we can all achieve eternal life with an end to human pain and suffering.

We, as human beings, want to live in a peaceful coexistence with God and the Holy Spirit. We must work with them to begin to end our suffering and to begin to solve our problems. We should be ready to work with them so that we can begin making progress toward achieving our destiny in our lives and in the lives of all of our brothers and sisters in the human family. We all hope that we can finally make a lasting peace with God and with the Holy Spirit
